General Instructions

You have been hired as a Financial Assistant and will be keeping the accounting records for Professional Business Associates, located at 5454 Cleveland Avenue, Columbus, Ohio 43231. Professional Business Associates provides accounting and other financial services for clients. You will complete jobs for Professional Business Associates' own accounting records, as well as for clients.

Unless otherwise instructed, round all answers to 2 decimal places.

Multiple Choice

- 1) A
- 2) A
- 3) C
- 4) D
- 5) B
- 6) C
- 7) B
- 8) C
- 9) A
- 10) A

Schultz Co. has two departments – mixing and bottling. The Mixing Department has 250 employees and occupies 20,000 square feet. The Bottling Department has 200 employees and occupies 18,000 square feet. Indirect manufacturing costs for the current period are \$180,000 for administrative and \$228,000 for maintenance. Administrative costs are allocated based on number of employees and maintenance costs are allocated based on square footage. Allocate the indirect costs to the two departments.

- Spangler Co. has three main divisions.

Compute the ROI for each division.

- Assuming a target income of 10% of average invested assets, calculate the Residual Income for each department.

- | | |
|--------------------------|--------------------|
| 6) Cameras | <u>\$2,000,000</u> |
| 7) Communication Devices | <u>\$200,000</u> |
| 8) Computers | (\$350,000) |

Problem 1: Incremental Analysis Scenarios (65 points)

Grader: Each answer is worth 5 points

Stalcup Patisserie is considering whether to continue making its own croissants or buy them from an outside supplier. The manager estimates that the variable costs of making each croissant is \$0.54 of ingredients, \$0.22 of variable overhead, and \$0.78 of direct labor. Using direct labor as the cost driver, management allocates \$1.05 of fixed overhead to each unit; none of the fixed costs are avoidable. The cost to buy the croissants would be \$1.80 per unit.

- 1) What is the full product cost of making the croissants in-house? \$2.59
- 2) Should Stalcup make or buy the croissants? Make
- 3) How much would Stalcup save/(lose) per unit by buying the croissants? (\$0.26)

DiSimoni Fashions has three departments: Men's, Women's, and Accessories. Departmental operating income data for the last quarter is as follows:

	Men's	Women's	Accessories
Revenue	\$105,000	\$58,000	\$92,000
Variable Costs	63,000	33,000	98,000
Fixed Costs	25,000	14,000	21,000

The fixed costs include the salary of the department's manager (80%) and advertising expenses for the company as a whole (20%).

- 4) What is the operating income of the Men's Department? \$17,000
- 5) What is the operating income of the Women's Department? \$11,000
- 6) What is the operating income of the Accessories Department? (\$27,000)
- 7) Should DiSimoni drop a department: and if so, which one? Accessories
- 8) How much income would be saved by dropping the department? \$22,800

Schumacher Toy Company is unsure whether to sell its product assembled or unassembled. The unit cost of the unassembled toy is \$30, and Schumacher would sell it for \$65. If Schumacher spends an additional \$21, they can sell the product for \$85.

- 9) How much will Schumacher profit/(lose) per unit if they sell the product assembled? \$34
- 10) How much will Schumacher profit/(lose) per unit if they sell the product unassembled? \$35
- 11) Should Schumacher sell the product assembled or unassembled? Unassembled

Elza Co. produces baseball cards. Each pack of cards normally sells for \$1.50. The Cubs approached Elza Co. to make a special order of baseball cards for their Hall of Fame Induction ceremony, and offered to pay \$0.97 per pack for 50,000 packs. Each pack costs \$1.05 to make.

Direct Materials	\$0.33
Direct Labor	0.28
Variable Overhead	0.24
Fixed Overhead	<u>0.20</u>
Total	\$1.05

- 12) Should Elza accept the special order? Yes
- 13) Assuming Elza accepts the special order, what will be the profit/(loss)? \$6,000

Problem 2: Capital Budgeting (95 points)

Bobb Corp. is considering three long-term investment proposals.

	Project		
	MM	DD	GF
Initial Investment	\$24,000	\$24,000	\$24,000
Annual net cash flows:			
Year 1	\$7,000	\$9,500	\$11,000
2	11,000	9,500	10,000
3	15,000	9,500	9,000
Total	<u>\$33,000</u>	<u>\$28,500</u>	<u>\$30,000</u>

The salvage value of each project is expected to be zero. Depreciation is computed using the straight-line method. The company's minimum rate of return is 12%.

Compute the following for each project:

Grader: Each answer in the box is worth 10 points

	Project		
	MM	DD	GF
Annual Rate of Return	25%	12.50%	16.67%
Payback Period	2.4 years	2.53 years	2.33 years
Net Present Value	\$1,698	(\$1,181)	\$201

Grader: The following answer is worth 5 points.

Which investment should be chosen? MM
