Part IV: SOAP Documentation – 100 points

NOTE TO GRADERS: There may be variations in wording and minor formatting as long as it does not change the context of the report. Number items in the PLAN. *Style & Reference Manual* should be followed for formatting.

Patient Name: William Otto
Date of Birth: 05/04/1933
Date of Exam: Current

PCP: Janice Karns, M.D.

Sex: M

SUBJECTIVE: The patient is a 66-year-old male who was referred by his family physician because of a lesion that has been bleeding the last several months. The patient indicated that he has had this small lesion on his right temple for about a year, but he thought very little of it. It has grown in size, now measuring almost 1 cm in diameter. He occasionally has a burning sensation.

OBJECTIVE: Physical exam shows an umbilicated lesion on the right temple that on vigorous touch bleeds slightly. The borders are raised.

ASSESSMENT: Clinical appearance of a basal cell carcinoma. Explained to patient that skin cancer is local invasive and that it does not usually metastasize.

PLAN: 1. Excision to remove the basal cell carcinoma.
2. Follow-up in six weeks.

Janice Karns, M.D.
