

PC SERVICING & TROUBLESHOOTING (305)

NATIONAL – 2019

Knowledge Test:

Certification Exam: MTA Windows OS Fundamentals _____ (100 points)

Objective Test:

Objective Test: _____ (500 points)

TOTAL POINTS _____ ***(600 points)***

Failure to adhere to any of the following rules will result in disqualification:

- 1. Contestant must hand in this test booklet and all printouts. Failure to do so will result in disqualification.**
- 2. No equipment, supplies, or materials other than those specified for this event are allowed in the testing area. No previous BPA tests and/or sample tests or facsimile (handwritten, photocopied, or keyed) are allowed in the testing area.**
- 3. Electronic devices will be monitored according to ACT standards.**

No more than sixty (60) minutes testing time

Workplace Skills Assessment Program competition.

Identify the letter of the choice that best completes the statement or answers the question. Mark A if the statement is True. Mark B if the statement is False.

1. My user came in to the office this morning and was able to successfully log into Windows, but is unable to send or receive email and is unable to access any intranet or internet sites. Which of the below is *not* possibly the issue?
 - a. No domain controller can be found
 - b. Bad NIC card
 - c. Bad network cable
 - d. Default gateway is down
2. Which of the symptoms below are *not* pointing to a bad video card?
 - a. Video is distorted and unclear
 - b. Black screen with no video at all
 - c. Screen goes black for a few seconds then an error message appears stating that the video drivers have crashed and had to be restarted
 - d. Monitor has a blue line down the center when connected to my pc and to my neighbor's
3. Where don't I look to see if my hard drive is out of space?
 - a. Windows key +E GUI
 - b. File Explorer
 - c. Device Manager
 - d. Computer Management
4. Every single time I start my Windows 10 computer, my iTunes starts up and makes my computer run very slow. I don't want iTunes to start automatically anymore. Where do I go to turn that "feature" off?
 - a. Control Panel / Apps
 - b. Start / All programs
 - c. Task Manager / Startup
 - d. MSConfig
5. My brother just called, and I told him about fixing the slowness on my computer because iTunes was starting automatically. He wants to do the same, but is running Windows 7. How does he make the same change?
 - a. Control Panel / Apps
 - b. Start / All programs
 - c. Task Manager / Startup
 - d. MSConfig

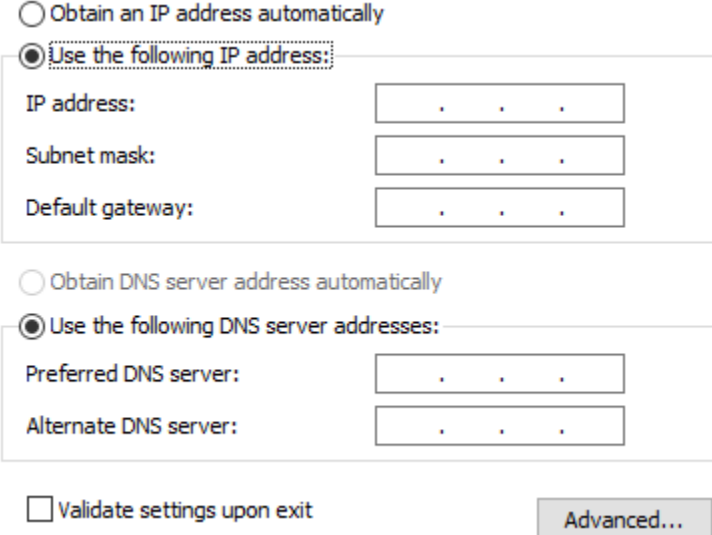

6. I got to work this morning and needed to print several reports. The reports that I printed to the network printer in my office printed fine. The reports that I print to our corporate office failed. What is the problem?
 - a. Bad IP address
 - b. DNS server can't be reached
 - c. Problem with the default gateway
 - d. DHCP server can't be reached
7. In order to verify my networking configuration, I run the following
 - a. Cmd – dxdiag
 - b. Cmd – ipconfig
 - c. Cpl – netstat
 - d. Cpl - mstsc
8. What does the padlock in the address bar of my browser mean?
 - a. Traffic to and from that site is encrypted
 - b. Traffic to and from that site is not allowed by my company
 - c. Traffic to and from that site is monitored by my ISP
 - d. There is a warrant out for my arrest
9. You have been tasked with upgrading your company's computers from 4GB of RAM to 8GB. How do you ensure that the memory that you purchase for your project will work in the existing computers?
 - a. Any 8GB sticks will work as long as they are all the same make
 - b. Any 4GB sticks will work as long as you replace both
 - c. Any memory will work in any computer so it doesn't matter
 - d. Research options based on your make and model HCL
10. On Monday night, I run a full backup of my working items folder. In this folder, I have 5 files. One is 40MB, one is 50MB, one 150MB, one is 500MB, and one is 550MB. The used space on my hard drive is 107GB. On Tuesday, I change just a few lines in my largest file. Once I have made my changes, I run an **incremental** backup. What will my incremental backup size be?
 - a. 107GB
 - b. 1.29GB
 - c. 550MB
 - d. 5KB
11. On Monday night, I run a full backup of my working items folder. In this folder, I have 5 files. One is 40MB, one is 50MB, one 150MB, one is 500MB, and one is 550MB. The used space on my hard drive is 107GB. On Tuesday, I change just a few lines in my largest file. Once I have made my changes, I run a **differential** backup. What will my differential backup size be?
 - a. 107GB
 - b. 1.29GB
 - c. 550MB
 - d. 5KB

12. On Monday night, I run a full backup of my working items folder. In this folder, I have 5 files. One is 40MB, one is 50MB, one 150MB, one is 500MB, and one is 550MB. The used space on my hard drive is 107GB. On Tuesday, I change just a few lines in my largest file and run a differential backup. On Wednesday, I change a few lines in my 150MB file and my 40MB file. Once I have made my changes, I run a **differential** backup. What will my differential backup size be on Wednesday night?
- 740MB
 - 190MB
 - 150MB
 - 40MB
13. On Monday night, I run a full backup of my working items folder. In this folder, I have 5 files. One is 40MB, one is 50MB, one 150MB, one is 500MB, and one is 550MB. The used space on my hard drive is 107GB. On Tuesday, I change just a few lines in my largest file and run an incremental backup. On Wednesday, I change a few lines in my 150MB file and my 40MB file. Once I have made my changes, I run an **incremental** backup. What will my incremental backup size be on Wednesday night?
- 740MB
 - 190MB
 - 150MB
 - 40MB
14. Which of the below is *not* an NTFS permission set?
- Owner
 - Read
 - Full Control
 - Modify
15. Which event log records audit events?
- System
 - Start Up
 - Security
 - Application
16. My printer prints without errors but it is so slow. Also, recently, I have noticed that I am going through a lot more ink than I used to. What can I do to address?
- Reduce print quality
 - Buy a new printer
 - Print using a USB cable rather wireless
 - Print wireless rather than a USB cable

17. Last week, my IT guy came by and gave me a new tower computer. Since he left, my new computer keeps losing connection to the network. Where the time is, I am getting a message saying "A Network Cable Is Unplugged" but I looked and it is plugged in. When I get mad and kick it, it starts to work again. My neighbor is complaining about my kicking my computer and is threatening to call HR. What is the issue?
- The hard drive is going bad
 - The monitor is incompatible with the new computer
 - The tech broke the clip on the network cable and it is loose
 - Windows 10 upgrade needs to be rolled back
18. I have a fairly new Lenovo ThinkPad T460s. It works great as a travel laptop when not docked. When I dock the laptop, I lose functionality. My dock's USB ports don't work. My external monitor will not work. The network connectivity does though. What's wrong?
- Power is not getting to the dock
 - Bad drivers on the laptop
 - Incompatible hardware
 - BIOS upgrade is needed
19. I just purchased a very cool new multifunction device. It prints regular paper. It prints pictures. It prints legal size. It even prints in white. It scans. It is a fax machine. I can even use it as a phone. It is awesome! The downside...once I attached it to my computer, my screen turned blue with a bunch of white words that I don't understand. What happened?
- Your computer caught a virus called Blueberry
 - Your MFD is too powerful for your computer
 - You have incompatible drivers
 - The phone is interfering with your network connection
20. I was cleaning the area around my desk at home the other day and all of a sudden, my monitor turned purple. Well, not the whole monitor, the display is all purple and I can hardly read it. Do I need to go buy a new monitor?
- Yes. You got your Windex on the screen and ruined it.
 - No. You knocked a cable loose. Check your connections.
 - No. The dust from your desk is now inside the monitor. Pick it up and shake it a little.
 - Yes. When you were cleaning, you must have bumped an LED which led to a virus.
21. A user tried to turn her computer on this morning and it beeped and shut off. It was like "beep beep beep" and then went black. She tried again. "beep beep beep" and nothing! She has urgent files and a critical presentation with her boss in an hour. What do you do to help her?
- Change the RAM. There is a memory issue.
 - Take the hard drive and put it in another computer chassis. The motherboard is bad.
 - Use the hard drive as a slave and try and get the files that way.
 - Apologize and offer to look over her resume with her when and if she get her files back.

22. When writing documentation for my users, I find it very helpful to use pictures to illustrate steps in the document. Often, I take these picture using a screen capture utility that comes native with Windows. What tool am I using?
- Snipping Tool
 - PhotoShop
 - SnagIt
 - Image Capture
23. According to Microsoft, the use of _____ “helps promote modularization of code, code reuse, efficient memory usage, and reduced disk space. Therefore, the operating system and the programs load faster, run faster, and take less disk space on the computer.”
- Dynamic Link Libraries
 - The internet
 - Freeware
 - Shareware
24. Every time I use Microsoft Excel, after about 15 minutes, my computer hangs and I can’t do anything at all. What do you suggest?
- Update to a newer version of Office
 - Switch to a competitor software
 - Use Office 365
 - Uninstall and reinstall the current version of Office
25. I am tired of my Windows 8 machine. I do not like the look and feel. I have heard that Windows 10 is a much better operating system. What is my first step in upgrading?
- Go buy the Windows 10 DVD
 - Research the minimum requirements to ensure that my PC will run adequately with Windows 10
 - Contact Microsoft for the download link
 - Backup my hard drive in preparation for the upgrade
26. How can I tell if a user account is locked out?
- Look up the account in Active Directory
 - Delete the account, recreate the account, and try logging in again
 - Look up the account in DHCP
 - Look up the account in DNS
27. I have read that I can improve my computer performance by allocating dedicated drive space for the OS and memory function. What configuration setting should I look at to find out how much space is currently dedicated?
- Control Panel
 - Task Manager
 - Page File
 - Disk Manager

28. Scott installed a new Windows 7 computer at the office this morning. He believes the configuration will be simple because he knows his company uses DHCP. He attached the network cable and powered the computer on. The computer turned on successfully but cannot access the Internet. Where should Scott look to check the network connection?
- Bluetooth Network Connection
 - Cisco AnyConnect Secure Mobility
 - Local Area Connection
 - Wireless Network Connection
29. Next, Scott decides to check the IP address of his connection. He right clicks the network connection icon, finds his connection and selects:
- Connect/Disconnect
 - Status
 - Diagnose
 - Properties
30. Once Scott makes his selection, he sees the GUI below. What should Scott do next?

The screenshot shows the 'Internet Protocol Version 4 (TCP/IPv4) Properties' dialog box in Windows 7. The 'Obtain an IP address automatically' radio button is selected. Below it, the 'Use the following IP address:' section is expanded, showing fields for IP address, Subnet mask, and Default gateway, each with a dotted placeholder. The 'Obtain DNS server address automatically' radio button is also selected. Below it, the 'Use the following DNS server addresses:' section is expanded, showing fields for Preferred DNS server and Alternate DNS server, each with a dotted placeholder. At the bottom, there is a checkbox for 'Validate settings upon exit' and an 'Advanced...' button.

- Enter a random IP address, as a temporary fix to get to the Internet
 - Select 'Obtain IP address automatically' and 'Obtain DNS server address automatically'
 - Only select 'Obtain IP address automatically'
 - Select 'Validate settings upon exit'
31. Scott still can't get to the Internet, so he decides to shell out to a command prompt and check his IP settings. How does Scott get to a command prompt?
- Click Start and type CMD in the search field
 - Right click Start and select Properties
 - Right click Start and select Open Window Explorer
 - Click Start and type IP Properties in the search field

32. Now Scott is at the command prompt. What should he type to obtain a detailed list of IP information?

- a. Ipconfig
- b. Ipconfig /details
- c. Ipconfig /all
- d. Ipconfig /alldetails

33. When Scott types his command, he sees the following. What is Scott's problem?

```
Ethernet adapter VirtualBox Host Interface 1:

Connection-specific DNS Suffix . : 
Description . . . . . : VirtualBox TAP Adapter
Physical Address. . . . . : 00-FF-F4-AC-0B-39
Dhcp Enabled. . . . . : Yes
Autoconfiguration Enabled . . . : Yes
Autoconfiguration IP Address. . . : 169.254.33.235
Subnet Mask . . . . . : 255.255.0.0
Default Gateway . . . . . : 

Ethernet adapter VirtualBox Host Interface 2:

Connection-specific DNS Suffix . : 
Description . . . . . : VirtualBox TAP Adapter #2
Physical Address. . . . . : 00-FF-A4-6A-12-2E
Dhcp Enabled. . . . . : Yes
Autoconfiguration Enabled . . . : Yes
Autoconfiguration IP Address. . . : 169.254.111.250
Subnet Mask . . . . . : 255.255.0.0
Default Gateway . . . . . :
```

- a. The computer is configured to use a static IP Address
- b. The network card is not working properly
- c. Scott is not logged in as an Administrator
- d. There is no DHCP server available

34. Kelly opens files from a shared drive each day, edits them, and then attaches them to an email. Today however, Kelly needs to place her edited file back on the shared drive in place of the one already there. What is the minimum permission Kelly will need to do this?

- a. Read & Execute
- b. Write
- c. Modify
- d. Full Control

35. Kelly just received a promotion and she wants to take ownership of the files on a shared drive that the woman she replaced had created. What is the minimal permission that Kelly must have to do this?

- a. Modify
- b. Full Control
- c. Special Permissions
- d. It is not possible for someone to take ownership of a co-workers files

36. Kelly wants to create a new department share. She only wants the team members that are mapped to the share to see it. Others, that do not have the share mapped, should not know that the folder exists. What should Kelly name the folder?
- Department
 - \$Department
 - Department\$
 - It is not possible to create this configuration
37. Scott gives Kelly Full Control of the department's shared drive. Then Scott selects the 'Data' folder on that drive, and checks the Deny box for the 'Read & Execute' permission. What will Kelly's effective permission be to the 'Data' folder?
- It depends on what her Share permissions are
 - Kelly will still have the inherited permission of Full Control because that is assigned at the parent level
 - Kelly will not be able to access the 'Data' folder because Deny overrides other permissions
 - Kelly will be able to see the contents of the 'Data' folder, but not edit any files
38. Scott is working to troubleshoot Kelly's effective permissions. Which of the following does he *not* need to take into account?
- Active Directory OU membership
 - Global group membership
 - Local group membership
 - Local permissions
39. When Scott is troubleshooting effective permissions, he needs to remember that
- Share permissions override NTFS permissions
 - NTFS permissions override Share permissions
 - Share and NTFS permissions are cumulative
 - Group Policy must also be taken into account
40. Holding down the Shift key during the boot process on a Windows 10 machine will
- Speed up the boot process
 - Access boot options
 - Start disk encryption
 - Boot from CD
41. I have a shared desktop computer at the back of my business office. This computer is only used for my employees to quickly login to the timekeeping application, and either start or end their shift. I would like to create a shortcut on the desktop so that anyone that logs into that computer can quickly open my timekeeping application. How do I do that?
- Create the shortcut individually for every user of that computer.
 - It can't be done. Shortcuts are not allowed on shared devices.
 - Login and create the shortcut, and it will appear for anyone else that uses that computer.
 - Create the shortcut in the Public Desktop folder.

42. My company has almost 100 workstations that all need access to the same group of printers. What utility can I use to export printers to a template from one machine and use that template to install all printers and drivers on all other machines?
- Print Management
 - Print Templating
 - Print Ghost
 - Print Force
43. My laptop was working just fine from home this morning while connected to my wireless network. When I got to work, I plugged in the network cable and started to work. I noticed that connection to the internet appears to be intermittent. What is the cause of my intermittent issue?
- I have a bad ip address
 - I have both wireless and wired network running, resulting in network conflict
 - Default gateway is flapping
 - DHCP failure
44. In any version of Windows, choosing _____ from the drive's properties will launch a program to remove files that are no longer needed by Windows.
- Disk Delete
 - Empty Recycle Bin Utility
 - Disk Clean-up
 - Disk Sweep
45. On my Windows 10 desktop, I have a black screen and I can't see anything. There is no way for me to log into Windows. What should I do?
- Repair the OS
 - Buy a new computer
 - Turn the monitor on
 - Reinstall the video driver
46. On my Windows 10 desktop, I have a black screen after I log into Windows. What should I do?
- Repair the OS
 - Buy a new computer
 - Turn the monitor on
 - Reinstall the video driver
47. What is a reverse lookup?
- Searching a file for content starting from the end to improve search results
 - Searching a folder structure for content starting from the end to improve search results
 - Converting IP addresses to host names
 - Searching using Boolean operators

48. Kelly's computer is locking too quickly and Scott needs to review her Group Policy. What is the GPO order of processing that Scott needs to be aware of?
- a. Local, Site, Domain, OU
 - b. Local, OU, Domain, Site
 - c. Site, Domain, OU, Local
 - d. Order of processing is irrelevant, since CPO's work in parallel and do not overwrite each other
49. I have a local policy that allows the use of the USB ports. I also have a domain policy that disables the use of USB ports. If I have no special rules in place, my effective permissions are allow use of the USB ports.
- a. True
 - b. False
50. By default, Group Policies are
- a. Cumulative, each applies in addition to the previous
 - b. Non-cumulative, last applied is what you get
 - c. Errored in the event of conflict
 - d. Only applied the first time a computer is added to the network
