

INFORMATION TECHNOLOGY CONCEPTS (391)

—OPEN EVENT—

NATIONAL – 2019

DO NOT WRITE ON TEST BOOKLET

TOTAL POINTS

_____ (100 points)

Failure to adhere to any of the following rules will result in disqualification:

- 1. Contestant must hand in this test booklet and all printouts. Failure to do so will result in disqualification.**
- 2. No equipment, supplies, or materials other than those specified for this event are allowed in the testing area. No previous BPA tests and/or sample tests or facsimile (handwritten, photocopied, or keyed) are allowed in the testing area.**
- 3. Electronic devices will be monitored according to ACT standards.**

No more than sixty (60) minutes testing time

Property of Business Professionals of America.
May be reproduced only for use in the Business Professionals of America
Workplace Skills Assessment Program competition.

Identify the choice that best completes the statement or answers the question. Mark “A” if the statement is true. Mark “B” if the statement is false.

1. Which of the following describes proving that an individual is who they say they are and is accomplished by a variety of techniques, including a username and password?
 - A. Authorization
 - B. Authentication
 - C. Accounting
 - D. Mandatory access lists
2. Which of the following is disabled by default and should remain disabled?
 - A. Guest account
 - B. Standard account
 - C. Administrator account
 - D. Everyone account
3. Which of the following is *not* an element of a secure password?
 - A. Eight or more characters in length
 - B. Mix of upper / lower case characters
 - C. Use of symbols
 - D. Consecutive letters or numbers
4. A failure of a Trusted Platform Module on a computer using BitLocker computer authentication can result in the loss of access to secured data.
 - A. True
 - B. False
5. When a mobile device is stolen, all data can be erased to protect the privacy of the owner. This process is known as which of the following?
 - A. Lojack
 - B. Jailbreak
 - C. Remote Wipe
 - D. Root
6. Data on a magnetic hard drive device cannot be destroyed.
 - A. True
 - B. False
7. Which of the following is *not* a symptom of a malware infection?
 - A. Strange error messages
 - B. Endless pop-ups in a web browser
 - C. Hijacked web searches
 - D. Hard drives making a clicking noise

8. Which of the following *best* describes malicious software that copies itself with the intent of overloading a computer system or network?
- A. Virus
 - B. Trojan
 - C. Grayware
 - D. Worm
9. A _____ is like a proof of purchase for software, and grants usage to the buyer.
- A. Utility
 - B. License
 - C. UPC
 - D. OEM
10. Chain of custody ensures that which of the following is true?
- A. Evidence will not be used in court
 - B. Evidence will be discarded
 - C. Possession of evidence is tracked
 - D. Evidence has been improperly secured
11. Users can be added and removed from the “Everyone group”.
- A. True
 - B. False
12. Members of which group on a Windows XP system have the ability to install applications and make limited changes to system settings:
- A. Users group
 - B. Power Users group
 - C. Backup operators group
 - D. Guests group
13. Group Policy can be used to create a QoS policy and apply it.
- A. True
 - B. False
14. What protocol do Web servers use to secure HTTP transmission to and from the Web server?
- A. SSL
 - B. EFS
 - C. IPsec
 - D. NAT
15. A _____ intercepts requests made by a browser and caches requests for websites for quicker access.
- A. Proxy Server
 - B. URL
 - C. Filter
 - D. Firewall

16. Which type of permission is received from a folder's parent folder?
- A. local
 - B. NTFS
 - C. share
 - D. inherited
17. Which type of permission can be applied to individual files as well as folders?
- A. Workgroup
 - B. parent
 - C. NTFS
 - D. share
18. With which permission is the user allowed to view permissions, but *not* change them?
- A. Modify
 - B. Full control
 - C. Execute
 - D. Read
19. You can mix NTFS permissions and share permissions on the same system.
- A. True
 - B. False
20. In which cloud computing category do customers rent hardware, including servers, storage, and networking, and can use these hardware services virtually?
- A. SaaS
 - B. IaaS
 - C. XaaS
 - D. RaaS
21. _____ is a setting that disables all wireless devices on an iOS or Android OS phone.
- A. Airplane mode
 - B. Firewall
 - C. ESP
 - D. Smartmode
22. Which of the following applications is *not* present on Android devices?
- A. Dialer
 - B. Web browser
 - C. App Store
 - D. Android Marketplace

23. Which of the following is a *unique* number that identifies each mobile phone or tablet device worldwide?
- A. IMEI
 - B. SIM
 - C. IMSI
 - D. ICCID
24. _____ is an online service available for iOS devices that allows synchronizing calendar, mail, and contact settings to all configured devices.
- A. App store
 - B. Google cloud
 - C. iCloud
 - D. Dropbox
25. Which iOS feature uses Bluetooth to detect nearby compatible devices, then creates a peer-to-peer network using a Wi-Fi signal between the devices?
- A. Syncing
 - B. Handoff
 - C. iCloud
 - D. AirDrop
26. Most of the settings you need to support an Android device are found in which app?
- A. Settings
 - B. Play Store
 - C. Google
 - D. Setup Wizard
27. What technology is available on both Windows Phone and Android to mirror the phone's display through a wireless connection with a TV?
- A. Tethering
 - B. Bluetooth
 - C. AirDrop
 - D. Miracast
28. With tethering, your computer can use the phone's cellular network connection to access the Internet.
- A. True
 - B. False
29. Which of the following can sometimes solve problems with dropped calls?
- A. Factory reset
 - B. Update the firmware
 - C. Use safe mode
 - D. Soft reset

30. Using the Software Recovery Tool erases all user data but keeps the settings on a Windows Phone.
- A. True
 - B. False
31. Which of the following statements is *not* true about a mainframe computer?
- A. A single computer with a single user is typical of a mainframe computer.
 - B. A mainframe computer provides the computing and storage capacity to meet massive data processing requirements.
 - C. A mainframe computer offers users high performance and excellent system availability.
 - D. A wide range of application software has been developed to run in the mainframe environment.
32. Which of the following statements is *true* of embedded operating systems?
- A. They represent a small, niche market.
 - B. They are dedicated to the control of another device.
 - C. They are used in a narrow range of applications.
 - D. They mainly determine the functionality of smartphones solely.
33. One of the *disadvantages* of proprietary software is that:
- A. it is hard to control results even if one is involved in the development of software
 - B. it can take a long time and significant resources to develop the required software features.
 - C. it does not allow modification of features that one might need to counteract an initiative by competitors.
 - D. it is difficult to achieve what is required in terms of features and reports.
34. One of the *advantages* of off-the-shelf software is that:
- A. an organization does not have to pay for features that are not required and never used.
 - B. the software always matches current work processes and data standards.
 - C. the initial cost is lower because the software firm can spread the development costs over many customers.
 - D. the software contains important features, thus eliminating the need for future modification and customization.
35. One *advantage* of proprietary software versus off-the-shelf software is that _____.
- A. the initial cost is lower
 - B. the software is likely to meet the basic business needs that are common across organizations.
 - C. the software is likely to be of high quality because many customer firms have tested the software and helped identify its bugs.
 - D. the software provides a company a competitive advantage by solving problems in a unique manner.

36. Which of the following is a *disadvantage* associated with client/server architecture?
- A. Moving applications from mainframe computers and terminal-to-host architecture to client/server architecture incur additional hardware and software support costs.
 - B. Security mechanisms cannot be implemented directly on the database server in client/server architecture.
 - C. Moving to client/server architecture is a major two- to five-year conversion process.
 - D. Client/server architecture maximizes traffic on the network.
37. Which of the following statements is *true* of an asymmetric DSL (ADSL)?
- A. It provides high speed Internet access solely to large businesses over the existing phone lines of the local telephone network.
 - B. It requires an additional phone line to provide "always-on" Internet access.
 - C. It provides a dedicated connection from each user to the phone company's local telephone office.
 - D. Its transmission speed remains high even when a subscriber is farther away from the local telephone office.
38. Based on a Supreme Court ruling, an Internet-based merchant needs to charge sales tax *only* when _____.
- A. the sale price exceeds \$100.00
 - B. buyers live in a state where the merchant has a physical presence
 - C. buyers purchase certain enumerated items
 - D. items are purchased through a consumer-to-consumer (C2C) Web site
39. The number of mobile Web sites worldwide is expected to grow rapidly because of:
- A. the availability of more costly handsets.
 - B. typically uniform product offerings.
 - C. advances in artificial intelligence technologies.
 - D. the development of new and useful applications.
40. A customer relationship management (CRM) system helps a company in managing _____.
- A. material sourcing and procurement
 - B. product development and manufacturing
 - C. distribution and accounting
 - D. human resources and finance
41. A *key* feature of an enterprise system is that it:
- A. helps a business function isolate information other functions and other levels of management.
 - B. is exclusive to small and medium-sized enterprises (SMEs).
 - C. employs a database of key operational and planning data that can be shared by all.
 - D. is only used by large organizations.

42. Which of the following statements is *true* of product lifecycle management (PLM) software?
- A. It distributes data only to the employees of an organization.
 - B. It provides documents required for FDA and environmental compliance.
 - C. It secures data so that changes cannot be made early in the product design process.
 - D. It is frequently employed by non-manufacturing organizations.
43. Which of the following can help avoid common causes for failed enterprise system implementations?
- A. Keeping the scope of a project fluid so changes can be easily incorporated.
 - B. Minimizing the time and money spent on training people.
 - C. Defining metrics to assess the progress of a project.
 - D. Making a fast transition from the old way of doing things to the new system and new processes.
44. A _____ is a climate-and-access-controlled building or a set of buildings that houses the computer hardware that delivers an organization's data and information services.
- A. data mart
 - B. data warehouse
 - C. data center
 - D. data mine
45. A type of memory whose contents are *not* lost if the power is turned off or interrupted is said to be _____.
- A. unarbitrary
 - B. nonvolatile
 - C. inaccessible
 - D. nonadjacent
46. _____ is the use of a collection of computers, often owned by many people or different organizations, to work in a coordinated manner to solve a common problem.
- A. Cloud computing
 - B. Grid computing
 - C. Parallel computing
 - D. Web computing
47. Computer programs are sequences of user instructions.
- A. True
 - B. False
48. The operating system converts a basic user request into the set of detailed instructions that the computer hardware requires, thus acting as an intermediary between the application and the hardware.
- A. True
 - B. False

49. The operating system's application programming interface (API) provides software developers with tools they use to build application software without needing to understand the inner workings of the operating system and hardware.
- A. True
 - B. False
50. Most operating systems support virtual memory, which allocates space on the hard disk to supplement the immediate, functional memory capacity of RAM.
- A. True
 - B. False
