

FUNDAMENTAL SPREADSHEET APPLICATIONS (230)

STATE – 2019

Production Portion:

Job 1: Create Spreadsheet with Formulas _____ (120 points)

Job 2: Format Spreadsheet _____ (121 points)

Job 3: Create 3-D Pie Chart _____ (80 points)

TOTAL POINTS _____ ***(321 points)***

Failure to adhere to any of the following rules will result in disqualification:

- 1. Contestant must hand in this test booklet and all printouts. Failure to do so will result in disqualification.**
- 2. No equipment, supplies, or materials other than those specified for this event are allowed in the testing area. No previous BPA tests and/or sample tests or facsimile (handwritten, photocopied, or keyed) are allowed in the testing area.**
- 3. Electronic devices will be monitored according to ACT standards.**

No more than ten (10) minutes orientation
No more than ninety (90) minutes testing time
No more than ten (10) minutes wrap-up

Property of Business Professionals of America.
May be reproduced only for use in the Business Professionals of America
Workplace Skills Assessment Program competition.

GENERAL INSTRUCTIONS

1. Make certain this test booklet contains Jobs 1-3.
2. Put your contestant and job number in the right section of the footer on each printout. Your name or initials should *not* appear on any work you submit.
3. If you finish before the end of the testing time, notify the proctor. Time may be a factor in determining a winner when there is a tie.
4. When turning in your contest, the jobs should be arranged in printout order. On page 3 is the rubric that will be used in scoring your printouts.

Special Instructions

Please use the following procedures for each sheet that you submit:

1. Save early and often. Loss of data, for any reason, is the contestant's responsibility.
2. Check the spelling on all worksheets.
3. Center all worksheets vertically and horizontally to print on *one* page.
4. Print all worksheets in Landscape format.
5. Print each chart on a separate sheet.
6. Key your contestant number and the job number in the right section of a footer on each worksheet and chart.

Scenario

You are an accounting college student working a 3-month summer job. You are living at home and want to keep track of your monthly expenses, so you have a fun summer, yet still have at least \$400.00 or more in savings at the end of the summer. Using the figures given, create a spreadsheet that calculates the information you will need to make sure you have at least something for your savings account.

GRADER: points are all or none unless otherwise noted!

Job 1 (Worksheet with Formulas)	Points Possible	Points Earned
Contestant # and Job # in right section of footer	10	
12 pt. Times New Roman font used for data	10	
Data entered correctly; -1 point for each error up to a maximum of 10 points	10	
Inserted Row after Movies; category labeled with Parking Lot Expense; all three months data is \$10	10	
Added Car Maintenance: Oil Change after Movies row with correct formula to calculate monthly payments for \$45 for 3 months.	10	
Added Car Insurance after Clothing row with correct formula to calculate monthly payments for \$450 paid bi-annually for 3 months.	10	
Label rows A19, E3, A20, F3, H20, G3 (2 points each)	12	
Each cell contains the correct start formulas: B19, E6, B20, F8, G20, G8 (absolute cell reference); 2 points each	12	
Adjust the cell information for C5 and D5 to 1200 (2 points each)	4	
Adjust the cell information for C12 to 25 and D12 to 15 (2 points each)	4	
Column widths adjusted to see all information	6	
Print worksheet in landscape view with the worksheet centered on one page	10	
Print formulas in landscape view with the worksheet centered on one page	12	
Subtotal	120	
Job 2 (Formatted Worksheet)	Points Possible	Points Earned
Contestant # and Job # in right section of footer	10	
Printed in landscape, centered vertically and horizontally on one sheet	10	
B5 to F20 is formatted to currency with 2 decimal places; G20 is currency with 2 decimal places	10	
Format G8 to G17 as percentage with 1 decimal place	10	
Formatted the following cell locations correctly: 3 points for each item for a total of 30 points • A1: merge and center across the spreadsheet, bold • B3: merge and center across the spreadsheet, middle align • C3: merge and center across the spreadsheet, middle align • D3: merge and center across the spreadsheet, middle align • A7: merge and center across the spreadsheet, bold • E3 and E4: merge and center; wrap text, middle align • F3 and F4: merge and center; wrap text, middle align • G3 and G4: merge and center; wrap text, middle align • H20 wrap text • A4 and A5, bold and center	30	
Format Cells A19 to G19 with a top row border	5	

FUNDAMENTAL SPREADSHEET APPLICATIONS - STATE 2019

Page 4 of 8

Format cells E5, F19, and G20 with bold (2 points each)	6	
Create a Line Sparkline in cell E20 for the 3 months of cash surplus	10	
Format the Sparkline in cell E20 by showing the high point and formatting it to a color style Sparkline colorful #2	5	
Sort A8:G17 with a custom sort of column A ascending order; level 2 column F ascending order	10	
Format spreadsheet title Summer Budget with a cell style of Title	5	
Format cell H20 with a cell style of Good	5	
Place a thick outside border around the entire spreadsheet	5	
Subtotal	121	
Job 3 (3-D Pie Chart)	Points Possible	Points Earned
Contestant # and Job # in right section of footer	10	
Correct 3-D Pie Chart created on its own sheet	10	
Print on full sheet, landscape in grayscale	10	
Correct title entered	5	
Format chart to style 10	5	
Increased the pie chart to fill the sheet	5	
Title size 28 pt. font	5	
Data labels are in dollar amounts and in size 11 font (5 points each)	10	
Legend is placed on bottom of chart—3 columns (legend text box increased if needed)	10	
Data labels placed Best Fit on the pie chart	5	
Smallest expense dragged out from rest of pie chart	5	
Subtotal	80	
TOTAL POINTS	321	

JOB 1: Create Spreadsheet with Formulas

1. Enter the following data into an Excel spreadsheet like shown below and complete the calculations as instructed. Use Times New Roman size 12 font and landscape orientation.

Summer Budget			
	June	July	August
Revenue			
Summer Job	1100		
Expenses			
College Savings	500		
Car Payment	200		
Clothing	100		
Eating Out	50		
Toiletries/Cosmetics	25		
iTunes Downloads	25		
Movies	15		

2. Fill in the remaining months with the same amounts shown from June.
3. Add the category Parking Lot Expense in the row after Movies. The amount for each month is \$10.00.
4. Insert a row at the appropriate location (descending order of payment amounts) to add the Car Maintenance: Oil Change payment--45 is needed at the end of the 3 months (calculate and budget as a monthly expenditure—this requires a formula) and fill in for the remaining months.
5. Insert another row, again in the appropriate location (descending order of payment amounts) to add the car insurance of \$450 paid bi-annually (calculate and budget as a monthly expenditure—this requires a formula) and fill in for the remaining months.
6. In cell B19, create a formula that calculates the total Sum of the expenses. Fill to cells C19 and D19.
7. Adjust the entries in cells C5 and D5 to 1200.
8. In cell E3, insert the text: Total Revenue.
9. In cell E5, create a formula that calculates the total Sum revenue for the 3 summer months.

10. In cell A20, type the text: Cash Surplus/Deficit Per Month.
 11. In cell B20, create a formula to find the difference between revenue and expenses. Fill Across.
 12. Adjust the entry for **cell C12 to 25** and **cell D12 to 15**.
 13. In cell F3, type the text: Total Per Each Expense.
 14. In cell F8, create a formula to find the total for all **monthly** expenses, fill down through total monthly expenses.
 15. In cell F19, create a formula totaling all expenses.
 16. In cell G20, create a formula to calculate how much **money** can be put in savings at the end of the three months.
 17. In cell H20, type the text: Three Months' Summer Savings.
 18. In cell G3, type the text: Percentage of Expenses.
 19. Create an absolute formula in cell G8 that calculates the percentage of the expense to the 3 months of total expenses and fill the formula down through G17.
 20. Adjust column widths as needed so all information shows.
 21. Print a copy of the worksheet vertically and horizontally centered in landscape view to one page.
 22. Print a copy of the worksheet showing the formulas vertically and horizontally centered in landscape view to one page.
-

JOB 2: Format the Spreadsheet

Format the spreadsheet created in Job 1 using the following instructions:

1. Format B5 to F20 as currency with 2 decimal places. Format G20 as currency with 2 decimal places.
 2. Format G8 to G17 to percentage with 1 decimal place.
 3. Format the following information:
 - A1: merge and center across the spreadsheet, bold
 - B3& B4: merge and center across the spreadsheet, middle align
 - C3& C4: merge and center across the spreadsheet, middle align
 - D3 & D4: merge and center across the spreadsheet, middle align
 - A7: merge and center across the spreadsheet, bold
 - E3 and E4: merge and center; wrap text, middle align
 - F3 and F4: merge and center; wrap text, middle align
 - G3 and G4: merge and center; wrap text, middle align
 - H20 wrap text
 - A4 and A5, bold and center
 - Adjust column E to 12 pt. width and adjust columns F and G to 16 pt. width
 4. Cells A19 to H19, add a border to the top of the row.
 5. Cells E5, F19, G20 bold.
 6. Create a Line Sparkline in cell E20 for the 3 months of cash surplus.
 7. Format the Sparkline in cell E20 by showing the high point and formatting it to color style Sparkline colorful #2.
 8. Sort A8:G17 with a custom sort of column A ascending order; level 2 column F ascending order.
 9. Format spreadsheet title Summer B with a cell style of Title.
 10. Format cell H20 with a cell style of Good.
 11. Place a thick outside border around the entire spreadsheet.
 12. Print out the formatted spreadsheet with it centered horizontally and vertically on one page.
-

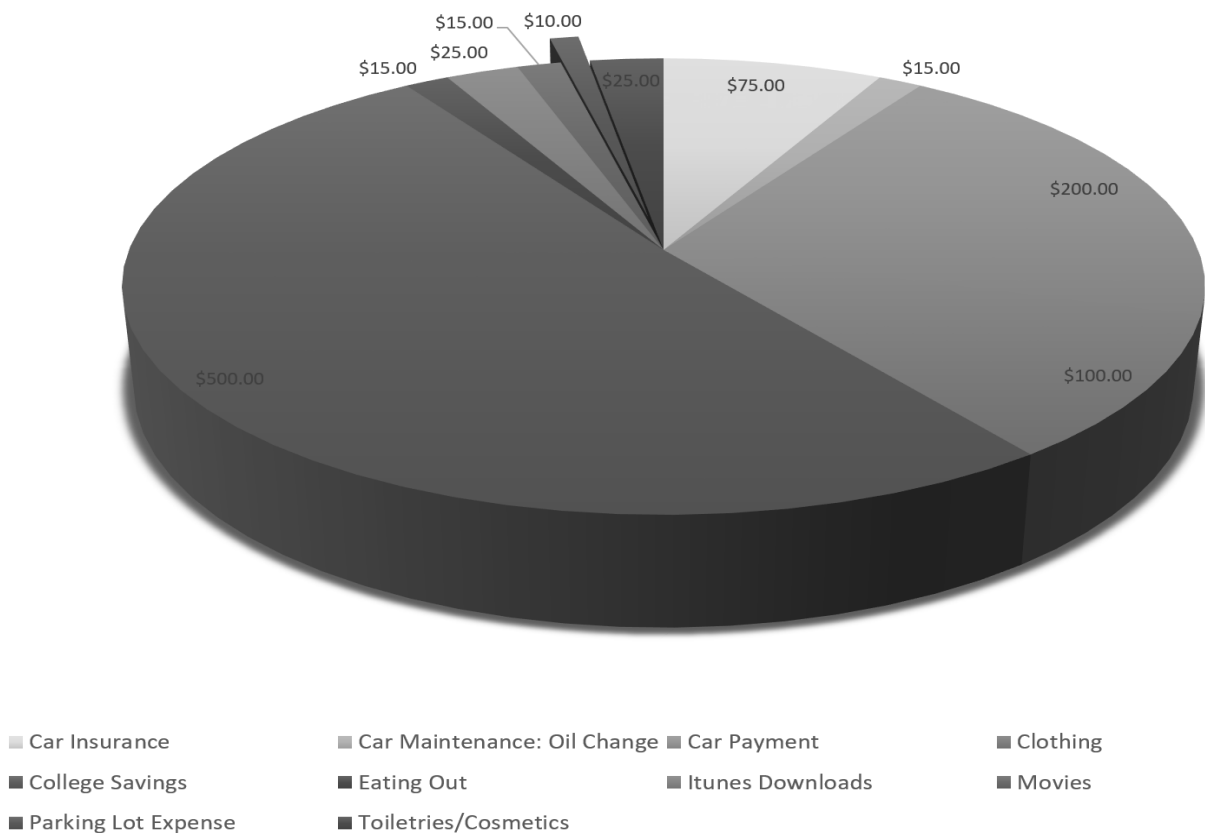

JOB 3: Create a 3D Pie Chart

Create a chart from the spreadsheet you have created in the previous jobs showing the monthly breakdown of the expenses within the spreadsheet. Cut the chart and paste it to its own sheet. Change the sheet name to Summer Expense Chart.

Format the chart to look like the following:

- Increase the size of the chart to cover cells A1:M33
- Format chart to style 10.
- Title is size 28 font. Title the chart: *Breakdown of Summer Expenses*.
- Legend is size 11 font and should be located at the bottom. The legend can be as shown below the chart in 3 columns. (if needed increase the legend text box)
- Add data labels as best fit.
- Drag out the smallest expense from the rest of the pie chart.
- Print out on full sheet in grayscale.

Breakdown of Summer Expenses

You should have the following four printouts:

Job 1—unformatted

Job 1—formulas

Job 2—formatted
