

ADVANCED SPREADSHEET APPLICATIONS (235)

STATE – 2019

TOTAL POINTS _____ ***(420 points)***

Failure to adhere to any of the following rules will result in disqualification:

- 1. Contestant must hand in this test booklet and all printouts. Failure to do so will result in disqualification.**
- 2. No equipment, supplies, or materials other than those specified for this event are allowed in the testing area. No previous BPA tests and/or sample tests or facsimile (handwritten, photocopied, or keyed) are allowed in the testing area.**
- 3. Electronic devices will be monitored according to ACT standards.**

No more than ten (10) minutes orientation
No more than ninety (90) minutes testing time
No more than ten (10) minutes wrap-up

Property of Business Professionals of America.
May be reproduced only for use in the Business Professionals of America
Workplace Skills Assessment Program competition.

General Instructions

1. **Key your contestant number and printout number in the right section of a footer on each printout on a separate line in the footer.** Your name or initials should *not* appear on any work you submit.
2. **Center the following information in a header on each printout: File name and the sheet name. Each item should appear on a separate line in the header.**
3. If you finish before the end of the testing time, notify the proctor. Time may be a factor in determining the winner in the event of a tie.
4. When turning in your contest, arrange all jobs in the correct printout order (included in instructions).
5. Write your contestant number in the provided spaces on the test cover page.

Formatting on Printout 1 (all or nothing for points)	Points	Total Points
Contestant Number and Printout # in right section of footer	5	
Sheet Name (PayReport) in center of header	5	
Applied Title cell style to A1, merged and center through column E	5	
A2 has Heading 4 Cell style, merge and center through column E	5	
Row 4 and A18 are 14 point Bold, Gray 25% fill	5	
Best Fit all Columns and Center column headings	5	
Left align all Employee ID numbers	5	
Apply currency style with zero decimals to B5:B14	5	
Printed in portrait orientation with no data truncated	5	
Typos (0 errors 40 points, 1 error 30 points, 2 errors 20 points, 3 errors 10 points, 4 or more 0 points)	40	
Total Printout 1	85	

Formulas on Printout 2	Points	Total Points
Contestant Number and Printout # in right section of footer	5	
E3 has function for date and formatted Day-Month-Year.	10	
VLOOKUP function in C5:C14 – must contain Data Table in formula	20	
VLOOKUP function in D5:D14- must contain Data Table in formula	20	
VLOOKUP function in E5:E14 - must contain Data Table in formula	20	
Mixed Reference where the column in formula is absolute	10	
A4:E14 converted to a Table and include a Header Row, Total Row, and Banded Columns	10	
Sum the pay column in the Total Row using the tables Total row options	10	
CountIf function in B20	20	
CountIf function in B21	20	
Correct conditional formatting in B5:B14	20	
Printed in landscape orientation, showing row and column headings, fit to one page with not truncated data (all or nothing points)	10	
Total Printout 2	175	
Pivot Table and Chart (all or nothing for points)	Points	Total Points
Inserted Contestant Number and Printout # in right section of footer	5	
Pivot Table and Chart on own worksheet named PivotTableChart	20	
Sheet Name (PivotTableChart) in center of header	10	
Table begins in cell A3	5	
Pivot Table display Gender and Average Pay only	10	
Average Pay in formatted currency style no decimal places	5	
Chart is placed in range A9:G23	5	
Chart has Horizontal and Vertical Axis	10	
Chart title “Average Pay” center above chart	10	
No data labels	10	
Add data table with legend keys to chart	10	
Gridlines added on primary major horizontal	10	
Printed in portrait orientation, showing row and column headings, fit to one page with not truncated data (all or nothing points)	10	
Typos (0 errors 40 points, 1 error 30 points, 2 errors 20 points, 3 errors 10 points, 4 or more 0 points)	40	
Total Printout 3	160	
Total Points	420	

Create a new Excel Spreadsheet file and save the file as: *235_ContestantNumber* in the location specified by the proctor.

As a manager of the City Market, you need to complete a pay report sheet. Please enter the following information in worksheet 1:

	A	B	C	D	E
1	City Market Payroll				
2	Pay Report				
3					
4	Employee ID	Pay	First Name	Last Name	Gender
5	110608	84,289			
6	253072	137,670			
7	352711	190,204			
8	391006	122,604			
9	392128	111,709			
10	549457	85,931			
11	580622	168,114			
12	602693	89,627			
13	611810	149,964			
14	820385	148,954			
15					
16					
17					
18	OutPut Area				
19	Female Count				
20	Male Count				

In the second worksheet add the following information:

	A	B	C	D
1				
2	Employee ID	Last Name	First Name	Gender
3	110608	Dillon	Jake	M
4	253072	Cline	Sidney	F
5	352711	Smith	Elizabeth	F
6	391006	Peters	John	M
7	392128	Fowles	Bret	M
8	549457	Young	Lucy	F
9	580622	Manning	Brad	M
10	602693	Woods	Allison	F
11	611810	Stark	Toney	M
12	820385	William	Peter	M

Formatting for Worksheet 1:

- In A1 apply Title Cell style to the title. Merge and center through column E
- In A2 apply the Heading 4 Cell style to the subtitle. Merge and center through column E.
- Format the cells in Row 4 and A18 to 14 points Bold, Gray 25% fill, Best Fit all Columns and Center headings.
- Left align all Employee ID numbers
- Apply currency style with zero decimals to B5:B14.
- Convert Worksheet 2 data A2:D12 to a table named Data_Table with only a Header Row.
- Name Worksheet 1 – PayReport
- Name Worksheet 2 – PayDataTable
- Print PayReport worksheet in portrait orientation. **Make sure that no data is truncated. This is Printout 1.**

Formulas:

- Insert a formula to insert the current date only in E3. Format date to be Day-Month-Year.
- Use the VLOOKUP function to return the First Name from the PayDataTable.
- Use the VLOOKUP function to return the Last Name from the PayDataTable
- Use the VLOOKUP function to return the Gender from the PayDataTable
- Convert A4:E14 to a Table and include a Header Row, Total Row, and Banded Columns.
- Sum the pay column using the Total Row options (*not* the Sum Function)
- Use a formula that will count the number of Female employees in B20.
- Use a formula that will count the number of Male employees in B21.
- Apply conditional formatting to B5:B14 using (3 symbol star icon set) to the following values:
 - Full-filled Star when value is $\geq 125,000$
 - Half-filled Star when value is $< 125,000$ and $\geq 100,000$
 - Empty-filled Star when value is $< 100,000$
- **Print PayReport worksheet formulas in landscape orientation fit to one page showing row and column headings. Make sure that no data is truncated. This is Printout 2.**

Pivot Table:

- Create a pivot table and chart from the data on the PayReport worksheet that will display on a new sheet named PivotTableChart. The Table should display:
 - the average pay of each Female and Male employee with the table beginning in cell A3
 - format the average pay in the table with currency style with no decimal places
- The chart should be formatted as:
 - Fit the chart in the range A9:G23
 - Apply Chart Style 5
 - Chart is formatted with Horizontal and Vertical Axis
 - Chart title “Average Pay” above chart
 - No data labels; remove legend
 - Add data table with legend keys to chart
 - Gridlines added on Primary Major Horizontal
- **Printed in portrait orientation, showing row and column headings, fit to one page with no truncated data (all or nothing points). This is Printout 3.**

CORRECT ORDER FOR TURNING IN PRINTOUTS

- ✓ Printout 1: PayReport worksheet in portrait orientation. No truncated data.
- ✓ Printout 2: Print PayReport worksheet formulas in landscape orientation fit to one page showing row and column headings. No truncated data.
- ✓ Printout 3: Pivot table in portrait orientation showing row and column headings fit to one page. No truncated data.
