**NOTE TO GRADERS:** There may be variations in wording and minor formatting as long as it does not change the context of the report. *Style & Reference Manual* should be followed for formatting.

**Part V: SOAP Documentation – 100 points**

**NOTE TO GRADERS:** There may be variations in wording, for example, “Pulse 92 and regular.” As long as it does not change the context of the report, wording may vary; however, materials should not be moved from one heading to another.

Patient Name: Grace Montgomery  
Date of Birth: 05/16/1983  
Date of Exam: 03/25/2017

PCP: Roger Melina, M.D.

Sex: F

**SUBJECTIVE:** The patient is complaining of itching and a rash that began about three weeks ago, starting on the hands and arms and then spreading to the chest and back. She is currently taking Benadryl at bedtime with little relief. She stated that she has tried a new perfume after her shower for the past three or four days.

**OBJECTIVE:** VITAL SIGNS: Temperature, 98.6 degrees; blood pressure 140/74, weight 145, height 5 feet 6 inches, heart rate 74, respiration 22.

SKIN: Ms. Montgomery has a smooth, erythematous rash over her neck extending over her trunk and back, as well as a spot on her lower back. She has a confluent, erythematous rash extending to fingertips on her upper extremities. Wheals with petechiae are noted in the antecubital fossae bilaterally.

**ASSESSMENT:** Contact dermatitis, secondary to allergy to perfume.

Note To Grader: This should not be numbered.

**PLAN:**

1. Avoid use of any perfume or perfumed soap.
2. Wash or dry-clean all clothing and linens exposed to suspected perfume.
3. Take diphenhydramine (Benadryl) 25 mg q6h x 3 days.

Note To Grader: PLAN should be numbered.
