

NETWORK ADMINISTRATION USING MICROSOFT® (310)

STATE – 2019

TOTAL POINTS _____ ***(500 points)***

Failure to adhere to any of the following rules will result in disqualification:

- 1. Contestant must hand in this test booklet and all printouts. Failure to do so will result in disqualification.**
- 2. No equipment, supplies, or materials other than those specified for this event are allowed in the testing area. No previous BPA tests and/or sample tests or facsimile (handwritten, photocopied, or keyed) are allowed in the testing area.**
- 3. Electronic devices will be monitored according to ACT standards.**

No more than sixty (60) minutes testing time

Workplace Skills Assessment Program competition.

MULTIPLE CHOICE

Identify the letter of the choice that best completes the statement or answers the question. Mark “A” if the statement is True. Mark “B” if the statement is False.

1. Which of the following statements is *true* regarding the page file?
 - a. The page file should be on the same volume as the Windows installation.
 - b. The page file should be on its own volume.
 - c. The page file should never be stored on a solid-state drive.
 - d. The page file should never be more than 2GB in size.
2. Which replication diagnostics test creates a test file in a replicated folder, then tests replication of that file to other servers in the replication group?
 - a. health report
 - b. propagation test
 - c. replication test
 - d. live transfer report
3. How often are computer and user policies applied after a user has logged into a computer?
 - a. every 20 minutes
 - b. every 60 minutes
 - c. every 90 minutes
 - d. every 120 minutes
4. When working with policies in the Security Configuration and Analysis snap-in, what does an X in a red circle indicate?
 - a. the template policy and the computer policy are the same
 - b. the policy wasn't defined in the template or the user running the analysis didn't have permission to access the policy
 - c. the policy doesn't exist on the computer
 - d. the template policy and current computer policy don't match
5. What icon might you see in Device Manager that indicates a problem with a device?
 - a. blue circle
 - b. yellow triangle
 - c. red square
 - d. white oval
6. What type of access control list defines the settings for auditing access to an object?
 - a. discretionary access control list
 - b. system access control list
 - c. mandatory access control list
 - d. hierarchical access control list

7. You need to monitor a group's access to a file that might be stored on several servers in the network. What should you do that requires the least administrative effort?
 - a. create a new resource property
 - b. create a global object access auditing policy
 - c. add the group to the DACL on each file
 - d. configure the Network File System
8. You need to allow your network technician to view the RMS logs and reports, but no additional permissions should be granted to this technician. What can you do?
 - a. delegate the AD RMS Auditor role
 - b. add the technician to the Backup Operators group
 - c. add the technician to the Domain Admins group
 - d. delegate the AD RMS Service role
9. How is the numeric string that makes up a digital signature created?
 - a. By using the user's SID
 - b. By generating a random UUID
 - c. By using a hash algorithm
 - d. By combining current date with computer serial numbers
10. Event logs are based on which of the following languages?
 - a. HTML
 - b. ASP
 - c. XML
 - d. CSV
11. You have a main office and a branch office connected via a WAN link. Users have complained that access to file shares has been slow. What feature can you install in Windows Server 2012 R2 that might help the problem?
 - a. Services for NFS
 - b. BranchCache
 - c. Tiered Storage
 - d. File Classification Infrastructure
12. What option under the folder redirection settings redirects everyone's folder to the same location?
 - a. Advanced
 - b. Targeted
 - c. Basic
 - d. Open
13. Where is the sysprep utility located within Windows?
 - a. C:\Windows\system32\sysprep
 - b. C:\sysprep
 - c. C:\Windows\Utilities\Sysprep
 - d. C:\Windows\Administrative Tools\sysprep

14. Involving both software and hardware, what technology is meant to protect digital content and prevent piracy?
 - a. HDMI
 - b. DRM
 - c. PPM
 - d. DVI
15. A group of engineers is working on a new project. The engineers have decided that Linux OS works best for this particular project, but they still need access to shared files on the Windows Server 2008 R2 servers. You want to allow the engineers to access the shared files using native Linux file sharing. What should you do?
 - a. install tiered storage on both the servers and Linux computers
 - b. install SAMBA on each of the engineer's computers
 - c. install Server for NFS role service on the servers
 - d. install an iSCSI IQN on the servers and iSCSI initiator on the engineer's computers
16. What printer property, enabled by default, might allow a lower priority print job already in the queue to start printing even if a job with a *higher* priority starts spooling?
 - a. hold mismatched documents
 - b. render print jobs on client computers
 - c. print spooled documents first
 - d. print smaller documents first
17. Which Windows log stores events collected from other systems, to which the system has a subscription?
 - a. System
 - b. Remotes
 - c. Forwarded Events
 - d. Servers
18. In the Performance tab of Task Manager, what field displays the amount of memory currently required by the OS kernel and drivers that can be written to virtual memory?
 - a. Committed
 - b. Cached
 - c. Paged pool
 - d. Non-paged pool
19. What can be used to restrict the driver packages installed by specific client computers, based on factors such as the BIOS, manufacturer, model, or OS edition used by the device?
 - a. Device group
 - b. Driver group
 - c. Image group
 - d. Install group

20. In the Processes section of the Resource Monitor utility, what category is used to display how much physical memory is currently in use?
- Commit
 - Working set
 - Shareable
 - Private
21. Which basic auditing policy audits attempts at user logons to and logoffs from a computer and attempts at logons to a network?
- Account Management
 - Object Access
 - Logon Events
 - System Events
22. What happens when a flash memory card is installed in a slot and it is recognized by Windows?
- A window appears prompting you to initialize the device.
 - A drive letter is assigned to the device and you can see it in Explorer.
 - Windows automatically partitions and formats the device.
 - The files are copied from the device to your Documents folder.
23. Which authentication type is used with the Extensible Authentication Protocol (EAP)?
- Secure Sockets Layer
 - Transport Layer Security
 - Kerberos
 - RADIUS
24. What type of policy setting is persistent, remaining even after a computer or user object falls out of a GPO's scope until it's changed by another policy or manually?
- Unmanaged policy setting
 - Managed policy setting
 - Strict policy setting
 - Owned policy setting
25. Settings in the Computer Configuration node of Administrative Templates affect which registry key below?
- HKEY_LOCAL_MACHINE
 - HKEY_LOCAL_USER
 - HKEY_CURRENT_MACHINE
 - HKEY_CURRENT_USER
26. When monitoring disk activity, response times consistently above what level indicate a serious problem?
- 5 ms
 - 10 ms
 - 20 ms
 - 50 ms

27. You plan to create 4 VMs on a new Hyper-V server. The Hyper-V server has 2 TB of free disk space. You want each VM to have up to 600 GB of hard drive space. Which feature should you use when configuring these VMs?
- Automatic provisioning
 - Differencing disks
 - Features on Demand
 - Thin provisioning
28. What type of encryption utilizes only a single key to encrypt and decrypt data?
- Hash encryption
 - Asymmetric encryption
 - Symmetric encryption
 - One-way encryption
29. To enable the Windows 7 Aero user interface, how much video memory must be available to the video controller?
- 64MB
 - 128MB
 - 256MB
 - 1GB
30. You are working on a server that is experiencing issues with a device driver. Under which log should you look for more information regarding the issue?
- System
 - Application
 - Security
 - Forwarded Events
31. When using disk quotas, how does Windows determine each user's disk usage?
- Using the folder name
 - Using a unique entry in the disk quota database
 - Using the file ownership information
 - Using shadow copies
32. What tool should be used to create real-time monitors that can be customized to show specific data on hardware, protocols, and applications?
- Task manager
 - Resource monitor
 - Performance Monitor
 - Message analyzer
33. What Windows log event level indicates that an issue does *not* immediately affect operations but might cause future problems if not addressed?
- Error
 - Critical
 - Warning
 - Information

34. What should you install in a server room that will save space by allowing you to control multiple servers with a single mouse, keyboard, and monitor?
- a MDI connector
 - a digitizer
 - biometric device
 - a KVM switch
35. When preparing a reference computer for image capture, what utility must be used to reset system identifiers and other information unique to the computer?
- Format
 - Sysprep
 - Windows PE
 - Imgprep
36. Which permission below can be granted to a user to allow the user to execute applications or scripts?
- Read
 - List folder contents
 - Write
 - Modify
37. The event level that indicates an unrecoverable failure in an application or component, is which of the following?
- Error
 - Critical
 - Warning
 - Information
38. What account or group is automatically designated as a recovery agent for all encrypted files created with EFS in a domain environment?
- Domain administrator
 - Operators group
 - Power Users group
 - Local administrator
39. The option that can be used in conjunction with the sysprep utility to remove unique identifiers on a system, is which of the following?
- /oobe
 - /generalize
 - /oem
 - /preimage
40. Which of the following is an attribute of a file that can be used to categorize the file's contents?
- Classification property
 - Compress or encrypt attributes
 - Regular expression
 - File auditing

41. Settings under the User Configuration node affect what Registry key?
- HKEY_LOCAL_MACHINE
 - HKEY_LOCAL_USER
 - HKEY_CURRENT_USER
 - HKEY_CURRENT_MACHINE
42. The basic auditing policy that can be used to track attempts to access or change non-Active Directory objects, such as files, folders, and printers is which of the following?
- Object Access
 - Directory Service Access
 - Process Tracking
 - Privilege use
43. What is a *basic* principle that applies to both internal and external devices?
- when connecting a faster device to a slower port, the port adapts to the speed of the device
 - if you have multiple devices to install, it's best to install them at the same time
 - for most installations, install the device first, then the device driver
 - some devices don't require a software component for them to work properly
44. Which statement regarding the USB standard and USB devices is *accurate*?
- up to 64 USB devices can be daisy-chained together
 - USB uses parallel data transmissions
 - a USB cable has four wires, two for power and two for communication
 - USB devices must supply their own power
45. A user calls, using a laptop, complaining that they are unable to sign into Windows even though they are certain they are entering the correct password, what should you have them do *first*?
- Perform a reboot
 - Bring the laptop to an authorized repair shop
 - Check the NumLock indicator on the laptop
 - Replace the laptop keyboard
46. In a new partnership with XYZ Company, ABC Company wants to share documents securely using web-based applications. All communication must be secure and document usage must be controlled. Both companies run Windows Server 2012 R2 domains but must remain in separate forests. What can you implement to facilitate this partnership?
- Two-way transitive realm trusts
 - AD Certificate Services and AD Lightweight Directory Services
 - Network Device Enrollment Services
 - AD Federation Services and AD Rights Management Services

47. A policy setting within the Security Configuration and Analysis snap-in with a question mark in a white circle indicates which option below?
- a. template policy and current computer policy don't match
 - b. template policy and computer policy are the same
 - c. policy wasn't defined in the template or the user running the analysis didn't have permission to access the policy
 - d. policy doesn't exist on the computer
48. How can administrators reduce the amount of processing that occurs on a print server?
- a. Add additional printers
 - b. Change the render print jobs on client computers options in the printer's properties
 - c. Add additional print devices
 - d. Change the spooling options in the advanced tab in the printer's properties
49. You have several thousand documents in the Marketing share. You need to be able easily identify those files that contain sensitive data. Which feature can *best* help with this task?
- a. BranchCache
 - b. File classification
 - c. Dynamic Access Control
 - d. Storage Reports
50. Within the Security Configuration and Analysis snap-in, what does an exclamation point inside a white circle indicate?
- a. policy doesn't exist on the computer
 - b. policy wasn't defined in the template
 - c. template policy and local policy don't match
 - d. template policy and computer policy are the same
