Part IV – HPIP Report, 40 points total

Directions: Proofread the following report and circle all errors found in the report.

HPIP			
Patient Name:	Jennifer Tomaley	PCP:	R.D. Kellams, M.D.
Date of Birth:	4/2002	Sex:	Female
Date of Service:	11/12/2019		
History of Present Illness:	Miss Tomley patient is a 17-year-old female who fell during an ice-skating competition on 11/11/2019. She suffered a fracture of the right inferior pubic ramus.		
Medications:	Recommended 400 mg of <u>advil</u> every 4-6 hours, as required for <u>pain</u>		
Physical Examination:	Blood <u>pressure</u> 120/74, pulse elevated at 80 beats per minute. Patient reports pain in <u>hips</u> , as expected from fall. Exam is otherwise normal.		
Impression:	Nondisplaced fracture, right inferior pubic ramus. <u>Eleviated</u> heartrate, likely due to pain.		
Plan:	Treat pain with prescribed <u>oct</u> medication. Low impact lifestyle for two weeks, then patient will return for follow-up and reassessment. <u>Crutchs</u> are provided for patient if needed.		

R.D. Kellams, M.D.

For Graders: There are 10 errors in this document, each circled error is worth 4 points.

Part V – SOAP Note, 100 points total

For Graders: Please ensure that margins are one inch on all sides, and that the patient's name line is 2.5 inches from the top. Wording and punctuation may vary but information must be accurate. ASSESSMENT SHOULD NOT BE NUMBERED AS THERE IS ONLY ONE.

Patient Name: Derek Gonzalez

PCP: Anthony Jacobson, M.D.

Date of Birth: 07/17/1947

Date of Exam: (told to use two days prior to today – mm/dd/yyyy)

Sex: Male

SUBJECTIVE: In for refills and review of diabetes mellitus status. Home glucose monitoring-taking BG readings 5 times (**NOTE to grader:** or 5 x week) per week, in a.m. only, while fasting. Average BG between 7-8. Patient trying to avoid sugar and foods that are high in carbohydrates but is finding this difficult. Patient is walking for thirty minutes per day at a slow pace.

OBJECTIVE: Bloodwork: A1C 7.2, LDL 1.9, ratio 3. BP 123/70, HR 72 regular.

ASSESSMENT: Diabetes (A1C not at target)

PLAN: Given patient education on A1C maintenance, diabetes, and target rates. Provided with support and information about nutrition. Reviewed BG testing, will check postprandial sugars twice per week until next visit. Patient encouraged to schedule eye exam. Increase Metformin to 1000 mg bid.

Anthony Jacobson, M.D.

AJ: (Contestant ID #)

D: (told to use yesterday's date – mm/dd/yyyy)

T: (told to use today's date – mm/dd/yyyy)
