Choose the *best* answer to the following questions. Mark answers clearly if using a scantron form.

1. You have a digital multimeter that is set for DC, Ohm, and 20K. What will the digital multimeter read while measuring a good 2 amp fuse?
 - a. 0.00
 - b. 0.02
 - c. 0.20
 - d. 2.00
2. What is the process of transferring data intended for a peripheral devices into a disk, this allows it to transfer to the peripheral device at a more convenient time, or in bulk. This process is known as _____?
 - a. Multiprogramming
 - b. Spooling
 - c. Caching
 - d. Virtual Programming
3. A spinning hard disk drive is divided into something called, Tracks, which are further subdivided into _____?
 - a. Clusters
 - b. Sectors
 - c. Vectors
 - d. Tables
4. What are Trojan Horse programs _____.
 - a. Are viruses that look like legitimate programs and then infect other files throughout your system
 - b. Are viruses that are installed on your computer that allows another user access to your PC
 - c. Are hidden programs that do not show up on the system
 - d. Are viruses that use up a lot of memory by copying the same file over and over again, using all of your resources
5. A computer HDD, also known as Hard Disk Drive, is considered _____ storage?
 - a. Auxiliary
 - b. Primary
 - c. Secondary
 - d. Tertiary
6. The data packet that travels between a browser and a web server, that tracks information about the users behavior is known as _____.
 - a. Pie
 - b. Adware
 - c. Spyware
 - d. Cookie

7. The IP address 171.10.200.254 is considered what class of IP address?
 - a. Class A
 - b. Class B
 - c. Class C
 - d. Class D
8. Which system software is an open-source operating system?
 - a. Linux
 - b. Windows 10
 - c. IOS
 - d. DOS
9. You must create a sales presentation for your company to give at the next board meeting. Which software application would you use to present your findings?
 - a. Microsoft Word
 - b. Microsoft PowerPoint
 - c. Microsoft Excel
 - d. Microsoft Access
10. If your computer case has missing slot covers, what could potentially happen to your computer?
 - a. The computer could cause power surges
 - b. The air flow will make the fan turn the wrong way
 - c. The computer could overheat
 - d. The computer will cool down
11. Which computer hardware is considered volatile Memory?
 - a. Read Only Memory
 - b. Hard Drive
 - c. Chipset
 - d. Random Access Memory
12. When data moves through the network, it travels as _____?
 - a. Payload
 - b. Payboard
 - c. Packets
 - d. Datagram
13. Your friends computer is suffering from a virus and their solution is to reinstall the operating system, but they don't want to purchase it. They know that you have a version of the Windows operating system. What do you say to your friend?
 - a. Say "okay" and give them the hard drive
 - b. Explain to them that is against the law and to purchase the OS
 - c. Load the operating system yourself
 - d. Just have them purchase a new computer with the OS already installed

14. What type of factory form Motherboard uses one 20 pin connector?
- ITX
 - MiniITX
 - MiniATX
 - ATX
15. A compiler is_____.
- A software utility that translates a program written in hexadecimal into binary
 - A software utility that translates a program written in machine language into high level language
 - A software utility that translates the program written in high language into machine level language
 - A software utility that translates a program written in computer language to human language
16. Which type of cloud storage is most secure?
- Personal Cloud Storage
 - Public Cloud Storage
 - Private Cloud Storage
 - Hybrid Cloud Storage
17. What is a local area network called that uses no physical wires?
- WAN
 - WLAN
 - LWAN
 - LAN
18. If you are running into issues with your computer, what is the first thing you should do?
- Run windows updates and restart your computer
 - Check firmware updates
 - Reinstall the OS
 - Back up all user content
19. DNS stands for _____.
- Domain Name System
 - Dynamic Name System
 - Domain Network System
 - Dynamic Network System
20. In Shell command, which command will long list the files and directories?
- ls-s
 - ls-r
 - ls-a
 - ls-l

21. Which of the following is the valid host range for the subnet for the IP address 192.168.168.188 255.255.255.192 resides?
- 192.168.168.128-190
 - 192.168.168.128-192
 - 192.168.168.129-190
 - 192.168.168.129-191
22. To create an unordered list in HTML, what tag would you use?
-
 -
 -
 - <dl>
23. When the computer boots up, at what location are those instructions available?
- BIOS
 - CPU
 - Boot.ini
 - CONFIG.SYS
24. When testing a speaker in a computer, what resistance in Ohms should be displayed?
- Q Ohms
 - 16 Ohms
 - 200 Ohms
 - Unlimited Ohms
25. What does the hibernation mode on your computer do?
- Reinstalls all drivers, updates, and firmware updates
 - Shuts down the computer completely and needs to be turned back on to resume work
 - Turns the screen black, or starts the screen saver, but still has all your current files open and can be awoken with a push of a button
 - Saves all documents to the hard drive
26. What happens when your computer shuts down without saving your progress?
- The data being stored in the RAM is wiped and not recoverable
 - The data gets stored on the hard drive and can be accessed again
 - The computer won't allow it to shut off until progress is saved
 - It gets saved on the RAM for later use
27. Which of the following creates a String constant call picture, whose value is CAT5?
- const char[4] picture = "CAT5";
 - const char[5] picture = 'CAT5';
 - const char[5] picture = "CAT5";
 - const char picture[4] = "CAT5";

28. What layer in the TCP/IP Stack has similar properties as the Transport Layer in the OSI Model?
- a. Network
 - b. Application
 - c. Transport
 - d. Client-Server
29. When a destination network unknown message needs to be sent back to the originating hosts, what protocol is used?
- a. TCP/IP
 - b. DHCP
 - c. ICMP
 - d. DNS
30. Which IP address is considered private?
- a. 12.0.0.1
 - b. 168.172.191.39
 - c. 172.32.140.36
 - d. 192.168.78.116
31. Which of the following is **not** a form of UNIX?
- a. Solaris
 - b. AIX
 - c. IRIX
 - d. AS400
32. In reference to a database, any time data files are entered that have a _____ which describes how the specified data is stored in that file.
- a. File Structure
 - b. Records
 - c. Fields
 - d. Database
33. What Cisco Command shortcut is used to create a backup configuration?
- a. Copy running backup
 - b. Copy running-config startup-config
 - c. Config mem
 - d. Startup-config running-config
34. In relations to computers, a bug means _____.
- a. A logical error in a program
 - b. A Difficult syntax error in a program
 - c. Memory allocation issues
 - d. Partitioning the hard drive

35. When a program runs on a computer, it executes it in a specific order using the sequence of _____.
- a. Fetch, Decode, Execute
 - b. Decode, Execute, Fetch
 - c. Decode, Fetch, Execute
 - d. Execute, Decode, Fetch
36. SQL stands for _____.
- a. Structured Query Language
 - b. Syntax Query Language
 - c. Simple Query Language
 - d. Semantic Query Language
37. Which type of network topology is the most commonly used network topology and doesn't broadcast the data to all the computers connected to it?
- a. Mesh
 - b. Ring
 - c. Bus
 - d. Star
38. Which Operating System, uses a command line interface instead of a GUI?
- a. Windows
 - b. Unix
 - c. macOS
 - d. Android
39. You were asked to create a website for a local business, what software would you use to write the code for the site?
- a. Adobe Muse
 - b. Adobe Dreamweaver
 - c. Adobe Premier
 - d. Adobe Acrobat
40. One of your co-workers sent you an email stating that something "wonky" is going on with their computer and ask for your assistance. What do you do?
- a. Explain to them that you are not a part of the IT department and they should ask them for assistance
 - b. Tell them to turn off their computer, wait 30 seconds, and turn it back on
 - c. Tell them to submit a ticket before any help can be given
 - d. Explain to them that you need more information about the problem before you can offer assistance
41. The decimal number 23, is what binary equivalent?
- a. 01011
 - b. 10111
 - c. 10011
 - d. 11011

42. Hexadecimal is also known as base _____ and contains _____ many digits?
- 2, 15
 - 8, 2
 - 10, 20
 - 16, 16
43. The file types wtmp and utmp maintain what kind of data?
- User login-logout log
 - Temporary system data
 - The user's command execution log
 - The user's su and sudo attempts
44. In Linux Command line, which command would you use to create a directory?
- newdir
 - mkdir
 - md
 - md -new
45. Which of the following addressing modes, facilitates access to an operand whose location is defined relative to the beginning of the data structure in which it appears?
- Ascending
 - Sorting
 - Index
 - Indirect
46. You need to access a user defined header file in C++, what is the correct syntax to use?
- #include <userdefined.h>
 - #include {userdefined}
 - #include (userdefined)
 - #include "userdefined"
47. You have just purchased a new printer and want to make sure that nothing is damaged. What is the first thing you can do to make sure your printer isn't damaged?
- Load the Ink and run a test page
 - Clean the nozzles
 - Check the cables
 - Unbox it and examine it for physical damage
48. The memory allocation scheme subject to "external" fragmentation is _____.
- When memory allocation is subject to external fragmentation.
 - When memory is being used completely
 - When not enough memory is available for use
 - When memory allocation is subject to internal fragmentation

49. What are the parameters in C++?
- a. Which are what functions are called
 - b. Variables that are never used
 - c. Variables that are passed to a function
 - d. Used to define a function
50. To help with computer air flow, you should do what?
- a. Open up the side of your case
 - b. Lift your PC off any carpet
 - c. Put a table fan next to the computer
 - d. set your room to 65 degrees
