# **SERVER ADMINISTRATION USING MICROSOFT (310) STATE 2021**

*TOTAL POINTS*

\_\_\_\_\_ (100 points)

**Test Time: 60 minutes**

**Choose the *best* answer to the following questions. Mark A if the statement is true. Mark B if the statement is false.**

1. What DNS record type identifies the authoritative name server for a domain?
  - a. TXT
  - b. PTR
  - c. SRV
  - d. SOA
2. What security risk is the account lockout feature designed to protect against?
  - a. Man-in-the-middle attack
  - b. Brute force attack
  - c. Smurf attack
  - d. Phishing attack
3. When a folder is moved to a new location on the same volume, what happens to the NTFS permissions of that folder?
  - a. It loses its permissions entirely and inherits the permissions from the new parent folder.
  - b. It keeps its permissions and inherits any new permissions from the parent folder.
  - c. The permissions do not change.
  - d. The user is prompted to keep the original permissions or inherit the permissions of the new folder.
4. Your Windows Server is crashing with a blue screen error, but no crash dump file is created. What is preventing the creation of the file?
  - a. The drive controller driver is an unsigned and unsupported driver.
  - b. The server is configured to reboot on an error.
  - c. The server dump file has incorrect permissions.
  - d. The server paging file has been placed in a RAID array.
5. How do you add permissions to view RMS logs and reports *without* granting additional permissions?
  - a. Add the user to the Backup Operators group.
  - b. Add the user to the Domain Admins group.
  - c. Delegate the AD RMS Services role to the user account directly.
  - d. Delegate the AD RMS Auditor role to the user account directly.
6. What are the default permissions applied to a shared printer object?
  - a. The Everyone Group has print permissions.
  - b. Only Creator Owner has print permissions.
  - c. Administrators have the Manage this printer and Manage documents permissions only.
  - d. The Remote Interactive Logon group has Manage this printer permissions.

7. How does the “Print spooled documents first” option function?
  - a. It enables jobs that have completed spooling to be printed, but only when using printer pools.
  - b. It ensures that printed pages do not intermix between different jobs.
  - c. It adds print jobs that have completed spooling to the printer queue according to the job priority.
  - d. It immediately prints jobs that have completed spooling, ignoring the order that jobs were received.
8. Which of the following security protocols is the preferred method for password encryption in Windows server 2016?
  - a. PAP
  - b. TKIP
  - c. L2TP
  - d. MS-CHAPv2
9. When configuring Kerberos, what does the “Enforce user logon restrictions” option do?
  - a. It enforces the account password configuration options in Group Policy during the login process.
  - b. It enables Kerberos security.
  - c. It forces user configuration options defined by Group Policy to be applied.
  - d. It forces a user to be subject to logon restrictions defined in the user’s properties in Active Directory Users and Computers.
10. When clearing cached DNS information on a Windows 10 workstation, what ipconfig command line option should you use?
  - a. /cleardns
  - b. /releasedns
  - c. /registerdns
  - d. /flushdns
11. What type of disk redundancy is considered the same as disk mirroring?
  - a. High-level striping
  - b. Duplexing
  - c. Leveling
  - d. Striping with parity
12. When analyzing a ping response packet, what does the TTL field indicate?
  - a. Total time lost, which indicates the amount of time lost in the transit of the packet.
  - b. Time to live, which indicates how many hops the packet has left before it expires and is discarded.
  - c. Time to lease, indicates how long the IP address will be used by the target computer.
  - d. Time to locate, indicates how much time was spent looking for the IP address on the network.

13. What is the default location for backups of the DHCP database?
- %systemroot%\System32\dhcp\dhcpcbakcup.txt
  - %systemroot%\System32\dhcp\dhcp.cfg
  - %systemroot%\System32\dhcp\backup\dhcpcfg
  - %systemroot%\System32\dhcp\backup\dhcp.mdb
14. When dealing with non-PostScript printers, what is the most common format used for page formatting?
- Printer Control Language (PCL)
  - Print Format File (PFF)
  - Enhanced Print Language (EPL)
  - Defined Print Control (DPC)
15. When defining a group policy using gpedit.msc, which folder under the “computer configuration” node contains policies that affect general computer system settings like disk quotas?
- Control Panel
  - Network
  - Server
  - System
16. Spooling print jobs is a method used to reduce \_\_\_\_\_ on the print server?
- Hard drive utilization
  - Memory utilization
  - Paged memory utilization
  - CPU utilization
17. You plan to configure a new VPN for your network to allow access from more restrictive, firewalled, mobile networks. Which tunneling protocol would be *best* suited for this task?
- PPTP
  - L2TP
  - Open VPN
  - SSTP
18. You have created a new DHCP scope with address range 192.168.100.1 to 192.168.100.254. You currently have seven file servers with static addresses in the range 192.168.100.1 to 192.168.100.7, and plan to add an additional ten servers also with static addresses in the same address area, 192.168.100.8 to 192.168.100.17. What must also be configured on your DHCP scope to accomplish this?
- New prefix length
  - Different lease duration
  - Reservations
  - Exclusion range

19. What is a caching-only DNS server?
- a. A DNS server that contains no zones.
  - b. A DNS server containing a stub zone.
  - c. A DNS server containing only a single reverse zone.
  - d. A DNS server containing only a single forward zone.
20. What is the purpose of the CNAME (Canonical Name) record in DNS?
- a. It contains the address of an e-mail server.
  - b. It is used for reverse DNS lookups.
  - c. It identifies the authoritative name server for the domain.
  - d. It is an alias record that allows multiple names for a single resource.
21. When a computer initiates network communication to request an IP address from DHCP, what type of packet is sent?
- a. DHCPREQUEST
  - b. DHCPDISCOVER
  - c. DHCPOFFER
  - d. DHCPNAK
22. When you choose to enable compressed files and folders, what is the primary disadvantage of this configuration change?
- a. Disk space usage is increased.
  - b. System memory utilization is increased.
  - c. CPU utilization is increased.
  - d. Time required to perform a backup is increased.
23. Which of the following statements is *correct* of print job priorities?
- a. A print job with a priority of 1 is considered a high priority.
  - b. A print job with a priority of 99 is considered a high priority.
  - c. Print jobs are assigned a priority of 99 by default.
  - d. Print jobs are assigned a priority of 50 by default.
24. You have been asked to implement a network solution that will allow your users to leverage virtual machines and session-based desktop access to run applications on remote servers. What is the best role to accomplish this task?
- a. Volume Activation Services
  - b. Remote Desktop Services
  - c. Remote Access Services
  - d. Network Controller Services
25. In Active directory, what is the first domain installed in a forest called?
- a. Master domain
  - b. Primary tree
  - c. Forest root
  - d. Global domain

26. Which of the following *accurately* describes RAID 60?
- a. Minimum of 8 disks, stripped with double parity
  - b. Minimum 6 disks, stripped with double parity
  - c. Minimum of 8 disks, striped with single parity
  - d. Minimum of 6 disks, striped with single parity
27. What Group Policy option is used to deploy a mapped network drive?
- a. User Configuration > Policies > Windows Settings > Scripts > Logon
  - b. User Configuration > Preferences > Windows Settings > Drive Mappings
  - c. Computer Configuration > Policies > Windows Settings > Scripts > Logon
  - d. Computer Configuration > Preferences > Windows Settings > Drive Mappings
28. Which options do you configure to customize a Resource Monitor report?
- a. Ticks
  - b. Counters
  - c. Intervals
  - d. Events
29. What is the purpose of a Printer Pool?
- a. Group users with access to network printers
  - b. Stage print jobs based on content type
  - c. Send print jobs to a single print queue for multiple printers
  - d. Organize devices by site location
30. What effect does it have when you place a \$ symbol at the end of a file share name?
- a. Hides the Share
  - b. Disables Share
  - c. Restricts to machine usage
  - d. Requires authentication
31. What is the purpose of an active directory OU?
- a. Method of trusting Domains in another forest
  - b. A schema extension for compatibility with Legacy systems
  - c. Primary container object for organizing and managing resources in a domain
  - d. None of the above
32. Which of the following is *not* a default Security group?
- a. DNS admins
  - b. Backup operators
  - c. Domain admins
  - d. None of the above

33. You have been tasked with adding new workstations to the ACME.corp network. Upon attempting to join the domain, you receive error “An Active Directory Domain Controller (AD DC) for the domain “ACME.corp” could *not* be contacted.” What could be causing the issue?
- a. The client is not using the correct DNS server address.
  - b. All Domain Controllers are offline.
  - c. The DNS server does not have the correct SRV records.
  - d. All the above.
34. Which Event viewer logs will show Active Directory replication failures?
- a. DFS Replication log
  - b. Active Directory Replication log
  - c. Directory Service log
  - d. SYSVOL Transfer log
35. Which of the following is *not* an advantage of using incremental backup?
- a. Faster than other types to create
  - b. Does not require all backups since initial full backup
  - c. Saves space over other backup types
  - d. Increments can each store different versions of a file
36. You need to push and apply Group Policy changes immediately. Which command do you use?
- a. Dcgpofix /time=0
  - b. Gpupdate /force
  - c. Remote-GPUUpdate
  - d. Gpremote /now
37. What PowerShell cmdlet can be used to let a user into a network shared folder?
- a. Chmod-SharedAccess
  - b. Change-FolderSecurity
  - c. Grant-SmbShareAccess
  - d. Set-GPOSecurity
38. What RAID level offers mirroring *without* parity?
- a. RAID 0
  - b. RAID 1
  - c. RAID 5
  - d. RAID 10
39. Which level of Group Policy Objects is applied last?
- a. Local
  - b. Domain
  - c. Org. Unit
  - d. Site

40. What Internet Information Services (IIS) logon method allows Active Directory logins to be used on an intranet web page?
- a. Basic Authentication
  - b. Windows Authentication
  - c. Challenge Authentication
  - d. Anonymous Authentication
41. Which RAID level supports striping with no parity?
- a. RAID 0
  - b. RAID 1
  - c. RAID 5
  - d. RAID 10
42. What password option is enabled by default on account reset or creation?
- a. Maximum password age
  - b. User must change password at logon
  - c. Passwords must meet complexity requirements
  - d. Enforce password history
43. Which of the following functions or roles *cannot* be managed in Windows Admin Center?
- a. Certificate Management
  - b. Hyper-V
  - c. Active Directory
  - d. Failover Cluster
44. How much of a DHCP clients lease time will expire before requesting a renewal from a server?
- a. 87.5% of lease period
  - b. 75.00% of lease period
  - c. 63.8% of lease period
  - d. 50.0% of lease period
45. Which statement about Tape backup drives is *not* true?
- a. Capacity of up to 480TB when compressed
  - b. Typically uses WORM media
  - c. Common for offsite storage in high security air gapped datacenters
  - d. Cannot be used by Windows Server Backup tool
46. Where is the Windows component store located used to repair the Windows image?
- a. The: C:\Windows\System32 folder
  - b. The C:\Windows\Drivers folder
  - c. The C:\Windows\WinSxS folder
  - d. The C:\Windows\System\backup folder

47. What is the proper reverse DNS lookup zone format for network 10.128.1.0/24?
- a. 10.128.1.arpa
  - b. 10.128.1.in-addr.arpa
  - c. 1.128.10.arpa
  - d. 1.128.10.in-addr.arpa
48. Which set of Registry values is used with the Last Known Good Configuration boot option?
- a. HKEY\_LOCAL\_MACHINE\SYSTEM\CurrentControlSet
  - b. HKEY\_CURRENT\_CONFIG\SYSTEM\CurrentControlSet
  - c. HKEY\_LOCAL\_MACHINE\SOFTWARE\CurrentControlSet
  - d. HKEY\_CURRENT\_CONFIG\SYSTEM\ControlSet002
49. Which of the following is *true* about DHCP Server options versus DHCP Scope options?
- a. Server options will contain domain information only.
  - b. Scope options are limited to options 002 through 099.
  - c. Server options apply to all scopes, but Scope options can override them.
  - d. None of the above is true.
50. What type of DNS record contains zone administration information on a given domain?
- a. A
  - b. AAAA
  - c. MX
  - d. SOA
