TOTAL POINTS _____ **100 Points**

Test Time: 60 minutes

Choose the *best* answer to the following questions. Mark answers clearly if using a scantron form. Mark A if the statement is true. Mark B if the statement is false.

1. How much free space is recommended on C: drive?
 - A. 5%
 - B. 15%
 - C. 25%
 - D. 35%

2. What is the second layer of the OSI model?
 - A. Application layer
 - B. Transport layer
 - C. Data Link layer
 - D. Physical layer

3. What does the acronym RAID stand for?
 - A. Radio And Independent Display
 - B. Redundant Array of Independent Disks
 - C. Reasonable Area of Individual Drives
 - D. Rapid Assembly of Independent Disks

4. A device that is used for complex processing and high-volume tasks is called a(n) _____.
 - A. supercomputer
 - B. laptop
 - C. personal computer
 - D. dumb terminal

5. What are the correct, chronological steps, to the SDLC?
 - A. Design, Development, Planning, Analysis, Testing, Implementation, Maintenance
 - B. Analysis, Design, Planning, Development, Testing, Implementation, Maintenance
 - C. Design, Planning, Development, Implementation, Testing, Analysis, Maintenance
 - D. Planning, Analysis, Design, Development, Testing, Implementation, Maintenance

6. What transmission mode only sends data in one direction?
 - A. Duplex
 - B. Multiplex
 - C. Simplex
 - D. Complex

7. What is the authentication method called that uses physical characteristics such as fingerprints or facial recognition?
 - A. biometric
 - B. biohazard
 - C. bionic
 - D. None of the Above
8. What was the name of the first communications network that is similar to the Internet of today?
 - A. PRIORNET
 - B. ARPANET
 - C. ARMYNET
 - D. FIRSTNET
9. An attack that attempts to flood a network with an overabundance of traffic so that it *cannot* function properly is called a(n) _____ attack.
 - A. Flood
 - B. Spoof
 - C. Man-In-The-Middle
 - D. DoS
10. What type of network is designed to service an entire metropolitan area?
 - A. WAN
 - B. LAN
 - C. MAN
 - D. PAN
11. A type of installed software that gathers information to be sent to others, without the user's knowledge or permission is _____.
 - A. freeware
 - B. spyware
 - C. shareware
 - D. flatware
12. The computer scientist credited as the inventor of the World Wide Web is _____.
 - A. Tim Berners-Lee
 - B. Ada Lovelace
 - C. Steve Jobs
 - D. Bill Gates

13. Malware infections can affect a computer in all of the listed ways *except* _____.
A. infinite Web browser pop-ups
B. error messages
C. hard drive noise
D. all of the above
14. When logging on a computer, the process of identifying yourself by username and password, is known as _____.
A. Authorization
B. Spyware
C. Authentication
D. Biometrics
15. The Intranet is a private network.
A. True
B. False
16. A Web browser exchanging information with a Web server is an example of which model of communication _____.
A. Star/Mesh
B. Client/Client
C. Server/Server
D. Client/Server
17. GSM or LTE cellular devices require _____ to be installed in the device.
A. ESN
B. SIM
C. GPS
D. SOS
18. Bringing a computer from a shutdown state to a working state is known as _____.
A. warming up
B. booting
C. error checking
D. shutting down
19. Using a top-down hierarchy, what is the top directory of subdirectories called?
A. Top directory
B. Up directory
C. Root directory
D. Base directory

20. What does a 64-bit OS require more of than a 32-bit OS?
- A. Storage Space
 - B. Cache
 - C. Memory
 - D. User Knowledge
21. Any drive larger than 2TB *must* use a GPT partition.
- A. True
 - B. False
22. Device drivers intended for use in a 64-bit OS will also function within a 32-bit OS.
- A. True
 - B. False
23. A technician installs two different operating systems on a computer, giving the user the option to boot to either OS. What has the technician provided to the user?
- A. a non-working computer
 - B. RAID
 - C. virtualization
 - D. dual boot
24. Installing an operating system, using an answer file, allows the technician to utilize what type of installation?
- A. recovery
 - B. network
 - C. unattended
 - D. ghosting
25. Replicating a drive from one computer, to multiple computers, is known as _____.
- A. imaging
 - B. cloning
 - C. copying
 - D. illegal
26. To avoid limitations in your Windows OS, how many days after installation do you have to activate the OS?
- A. 15
 - B. 30
 - C. 60
 - D. 90

27. To create a secure password, you should use all of the following rules *except* _____.
A. mixture of uppercase and lowercase letters
B. symbols
C. consecutive letters or numbers
D. length of eight characters or more
28. The person responsible for the visual content of a website is called a _____.
A. Web designer
B. Webmaster
C. Web browser
D. Web administrator
29. What is the sixth layer of the OSI model?
A. Physical
B. Application
C. Datalink
D. Presentation
30. What does the acronym SMS stand for?
A. Short Message Service
B. Save My Ship
C. Send Message Service
D. Send Multimedia Share
31. A _____ network topology has one central computer, called a hub, to which all devices are connected.
A. mesh
B. bus
C. star
D. P2P
32. UEFI stores device drivers and secure boot information on this type of chip.
A. RAM
B. DRAM
C. CACHE
D. NVRAM
33. The _____ is considered the backbone of the computer, connecting all of its components.
A. motherboard
B. drives
C. memory
D. CPU

34. What is another name for memory that is *not* lost when a computers power is cycled?
- A. non-volatile
 - B. volatile
 - C. primary
 - D. secondary
35. A low-level programming language translated into machine language for use by the computer is _____.
- A. HTML
 - B. C#
 - C. Assembly
 - D. Java
36. What is the *first* recommended step to solve a computer *not* turning on?
- A. Check to see that the computer has power and is plugged in.
 - B. Check the power supply for damage.
 - C. Recommend the user purchase a new computer.
 - D. Remove the front cover, and attempt to replace the power button with one that works.
37. The standard protocol used to send email is _____.
- A. IMAP
 - B. POP
 - C. SMTP
 - D. HTML
38. HTTP communication uses which port?
- A. 23
 - B. 80
 - C. 55
 - D. 85
39. What is the default loopback address on most systems?
- A. 192.168.1.1
 - B. 0.0.0.0
 - C. 127.0.0.1
 - D. 255.255.255.255
40. In networking, what is PoE used for?
- A. Assigns an IP to a device
 - B. Allows a device to access the network
 - C. Secures the network
 - D. Provides power to a device on the network

41. What does the acronym VoIP stand for?
- A. Voice over Internet Protocol
 - B. Video over Internet Protocol
 - C. Video over Internal Process
 - D. Voice over Internal Process
42. Which method does *not* secure a wireless network?
- A. Disable SSID broadcast
 - B. Hiding your access point in the closet
 - C. MAC address filtering
 - D. Enabling WPA
43. What does AD stand for?
- A. Active Directory
 - B. Active Disk
 - C. Active Dialup
 - D. Activate Domain
44. One megabyte is equivalent to how many kilobytes?
- A. 100,000
 - B. 100
 - C. 10,000
 - D. 1,000
45. How many bits makes up one byte?
- A. 1 bit
 - B. 8 bits
 - C. 256 bits
 - D. 4 bits
46. What does SQL stand for?
- A. Structured Question Language
 - B. Structured Question Learning
 - C. Strong Query Learning
 - D. Structured Query Language
47. What does CSS stand for?
- A. Creative Song Sheet
 - B. Creative Style Sheet
 - C. Cascading Style Sheet
 - D. Colored Style Sheet

48. What component directs traffic across different networks?

- A. Switch
- B. Router
- C. Hub
- D. Firewall

49. How many bits long is an IPv6 address?

- A. 128
- B. 256
- C. 8
- D. 32

50. What component is a loopback plug used to test?

- A. RAM
- B. Power Supply
- C. Network Port
- D. Expansion Slots
