COMPUTER MODELING

(425)

STATE 2021

Description

Given a scenario or prompt, Computer Modeling will research the topic, create a profile, concept design(s), prototype(s), and final model and/or scene based upon the assigned topic provided. For example – a new Pixar® type character made of metal (refer to background information supplied about character); an opening scene to support a new sci-fi movie; an office chair designed for the year 2050; an environment for a Mars colony in the year 2075, etc.

Topic

You have been asked by a local movie company to create a new character for an upcoming animated feature film. (This character should include arms, legs, facial features.

Members who do *not* submit an entry following this topic will be *disqualified*. Particular attention should be paid to the Copyright & Fair Use Guidelines.

Judging Procedure

- As a team of judges, formulate two to three questions to ask at the conclusion of the presentation. Be sure to ask the same questions of each Member.
- Members will present before a panel of judges and timekeeper.
- The length of set-up/wrap-up will be no more than three (3) minutes.
- The length of the presentation will be no more than ten (10) minutes; followed by judges' questions not to exceed five (5) minutes.
- Excuse Members upon completion of judges' questions.
- **There can be no ties in the top ten (10) Members.** It is the responsibility of the judges to break any ties.
- Administrator will fill out ranking sheet prior to dismissing the judges.
- If more than one (1) section is necessary, finalists will be determined by selecting an equal number from each section.
- Give administrator all Judges' Scoring Rubrics, Judge Comment Sheets and contest materials.
- No audience is allowed in the contest room.

Please double-check and verify all scores!

Possible Questions

- What challenges did you face when creating this project?
- What research did you conduct prior to creating your model?
- Who do you feel will enjoy your model the most?
- Why did you choose the software you used for this project?
- What part of this project are you the proudest of?
- If you were to make this model again, what would you do differently?
- What problem solving skills did you apply in this event?
