

Contestant Number: _____

Time: _____

Rank: _____

HEALTH ADMINISTRATION PROCEDURES (610) STATE 2021

Questions:

Objective Questions _____ (80 points)
40 @ 2 points each

Production:

Job 1: HPIP _____ (100 points)

Job 2: SOAP _____ (100 points)

TOTAL POINTS: _____ (280 points)

Test Time: 60 minutes

GENERAL GUIDELINES:

Failure to adhere to any of the following rules will result in disqualification:

1. Member must hand in this test booklet and all printouts if any. Failure to do so will result in disqualification.
2. No equipment, supplies, or materials other than those specified for this event are allowed in the testing area. No previous BPA tests and/or sample tests (handwritten, photocopied, or keyed) are allowed in the testing area.
3. Electronic devices will be monitored according to ACT standards.

EXAM GUIDELINES:

1. Ensure this test booklet contains Jobs 1-2.
2. Key all jobs according to the instructions given.
3. Correct any and all formatting, spelling or grammar errors. Use the formatting guide in the *Style & Reference Manual*.
4. Your name or initials should *not* appear on any work you submit. Use your Member ID in any occasion you would normally key your reference initials.
5. In the lower **right** hand corner of ALL work submitted (unless otherwise specified), key your contestant number and job number.
6. If you complete the event before the end of the time allotted, notify the proctor. Time may be considered a factor in determining a winner when there is a tie score.
7. Place your scoring sheet on top of your jobs. Jobs should be placed in numerical order.

PRODUCTION STANDARDS	
0 Errors	100 Points
1 Error	90 Points
2 Errors	70 Points
3 Errors	50 Points
4+ Errors	0 Points

Identify the letter of the choice that best completes the statement or answers the question.

NOTE: For True/False questions, Mark A if the statement is True. Mark B if the statement is False.

1. The word part that contains the fundamental meaning of the word is the _____.
 - A. prefix
 - B. word root
 - C. suffix
 - D. combining vowel
2. Voice recognition software, also known as speech recognition, automatic speech recognition, or language recognition software, does what?
 - A. Converts voice to text
 - B. Converts text to voice
 - C. Recognizes hard-to-understand voices
 - D. None of the above
3. The “P” in HIPAA stands for: _____.
 - A. Public
 - B. Portability
 - C. Privacy
 - D. Physician
4. Objective findings can be observed and measured.
 - A. True
 - B. False
5. Which of the following is an example of hardware?
 - A. Input devices
 - B. Output devices
 - C. CPU
 - D. All of the above
6. _____ means “within or through a vein.”
 - A. intubation
 - B. infiltrate
 - C. intravenous
 - D. ET tube
7. The “Basic 4” are the H&P, OP, Consultation and Discharge Summary.
 - A. True
 - B. False

8. A patient's medical chart and the information in it are the property of which of the following?
- A. State board of medical examiners
 - B. Patient and family
 - C. Physician and the patient
 - D. State drug enforcement agency regional office
9. What is the term for the conducting of live conferences on computers by health-care professionals in separate locations?
- A. aeromedicine
 - B. holistic medicine
 - C. telemedicine
 - D. nuclear medicine
10. Which of the following *best* describes a filing method that serves as a reminder for future actions?
- A. Shingling file
 - B. Purging
 - C. Indexing
 - D. Tickler file
11. _____ is medication given to prevent nausea and vomiting caused by surgery or cancer medicines.
- A. Lasix
 - B. Atrovent
 - C. Coumadin
 - D. Zofran
12. An unaware employee can be an organization's greatest weakness when it comes to data security.
- A. True
 - B. False
13. When can statements no longer be sent or any attempt be made to collect a delinquent account?
- A. When the patient dies
 - B. When the patient declares bankruptcy
 - C. When the patient skips or moves with no forwarding address
 - D. When the patient loses in small claims court

14. When traditional paper-based charts are used, HIPAA compliance mandates no identifiable patient information should be located on the outside of the chart. This information includes all of the following *except* _____.
- A. social security number
 - B. date of birth
 - C. address
 - D. all of the above information should not be placed on the outside of the chart
15. The oncology patient's pathology report stated that there is metastasis present, which means that _____.
- A. no cancer is present
 - B. there is improvement
 - C. cancer is temporarily stopped
 - D. the cancer has spread
16. Choose the *correct* filing order for the following persons.
1. Peter J. Lally; 2. Peter J. Lally Jr.; 3. Peter J. Lally III; 4. Peter Lally
- A. 4, 3, 2, 1
 - B. 1, 3, 4, 2
 - C. 4, 1, 3, 2
 - D. 2, 1, 3, 4
17. The canal leading from the bladder, discharging urine externally, is the _____.
- A. ureter
 - B. urethra
 - C. ureteroscopy
 - D. pyeloscopy
18. The "A" in SOAP charting stands for _____.
- A. Anatomy
 - B. Assessment
 - C. Activity
 - D. Action
19. A patient lying on their back facing upward would be in what position?
- A. prone
 - B. Trendelenburg
 - C. Sims
 - D. supine

20. Most electronic health records systems can record telephone messages.
- A. True
 - B. False
21. The study of disease is called ____.
- A. visceral
 - B. etiology
 - C. somatogenic
 - D. pathology
22. Enunciation is *not* crucial when speaking on the telephone.
- A. True
 - B. False
23. Which of the following is spelled *incorrectly*?
- A. rhabdomyoma
 - B. erythrocyte
 - C. somatac
 - D. leukocytosis
24. Providing relief but *not* a cure is palliative care.
- A. True
 - B. False
25. A flexible, tubelike device for withdrawing or instilling fluids is a ____.
- A. catheter
 - B. lithotrite
 - C. urinal
 - D. stricture
26. Which word is spelled *incorrectly*?
- A. amniocentesis
 - B. omphalocele
 - C. esophagal atresia
 - D. dystocia
27. Which of the following is the *correct* order for files stored in an alphabetic storage system?
- A. Third Street Cleaners, Over 50 Club, 1 Stop Shop, 4th Avenue Bakery
 - B. 1 Stop Shop, Third Street Cleaners, 4th Avenue Bakery, Over 50 Club
 - C. 1 Stop Shop, 4th Avenue Bakery, Third Street Cleaners, Over 50 Club
 - D. 4th Avenue Bakery, Third Street Cleaners, 1 Stop Shop, Over 50 Club

28. What is known as a method of identifying how long an account has been overdue?
- A. Account aging
 - B. Account identifying
 - C. Overdue aging
 - D. Overdue identifying
29. A malabsorption syndrome caused by an immune reaction to gluten is called ____.
- A. Crohn disease
 - B. volvulus
 - C. celiac disease
 - D. cirrhosis
30. _____ is a traumatic break in tissue or a pathologic loss of function of a part of the body.
- A. axial sections
 - B. carina
 - C. lesion
 - D. mediastinal
31. Inventory management involves ordering, tracking, and identifying the quantity of product to purchase.
- A. True
 - B. False
32. A combining form that means “mind” is ____.
- A. cerebr/o
 - B. esthesi/o
 - C. phas/o
 - D. psych/o
33. A viral disease that affects the peripheral nerves and causes blisters on the skin that follow the course of the affected nerves is ____.
- A. sciatica
 - B. multiple sclerosis
 - C. shingles
 - D. cerebral palsy
34. When a patient misses or cancels an appointment, it should be documented in the electronic patient record for legal purposes.
- A. True
 - B. False

35. The patient, who had sagging of the right side of his mouth and was unable to close his right eye, received a prescription for Prednisone to reduce edema of the facial nerve. This paralysis of muscles on one side of the face is called
- A. Bell palsy
 - B. monoplegia
 - C. encephalitis
 - D. sciatica
36. Patient records left on the reception desk would *not* be considered a violation of HIPAA.
- A. True
 - B. False

- A. CRB
 - B. DNR
 - C. EOB
 - D. BSD
38. Down Syndrome was diagnosed prenatally by laboratory analysis of the amniotic fluid obtained by aspiration of fluid by surgical puncture or a(n) _____.
- A. amnioscope
 - B. episiotomy
 - C. amniocentesis
 - D. amnionitis
39. Stress will *only* affect you mentally.
- A. True
 - B. False
40. The term meningocele means there is a protrusion through a neural arch defect in the vertebral column of the meninges and the _____.
- A. spinal cord
 - B. brainstem
 - C. cerebrum
 - D. ganglion

Instructions: *Review the directions for the “Jobs” listed below and complete. Correct any and all formatting, spelling or grammar errors. Use the formatting guide in the Professional Business Associates Style & Reference Manual.*

JOB 1 - Complete the HPIP Medical Transcription Form

DIRECTIONS: *Linda Thompson, M.D. treated male patient Casey Smith, who was born on January 24, 1954 for a history of left vocal cord cancer. The plan is for the patient to return to the clinic in 3 months. Please complete the following report for Dr. Thompson using today’s date for the date of exam and dictation date. Use tomorrow’s date for the transcribed date.*

History of present illness: This is a 67-year-old male with a history of a left vocal cord cancer, which was treated with radiation therapy. He subsequently had recurrence, which resulted in hemilaryngectomy. After that, he had another primary requiring total laryngectomy. Then he developed a radiation-induced sarcoma of the nasopharynx and, therefore, underwent resection of this with reconstruction with a pectoralis flap. His postoperative course was complicated by necrosis and fistula, with the requirement of being taken back to the operating room for a second operation last month for debridement and reclosure of the wound.

Today he is here for follow-up. He recently underwent an esophageal dilation, and he reports a 40% improvement in his swallowing since that time. He reports dysphagia for solids and liquids, which has been worsening since his dilation. He denies any dyspnea, odynophagia, otalgia, weight loss, or any other complaints. Past medical history, past surgical history, medications, allergies, family history, social history, and review of systems were reviewed and found to be unchanged from the previous note.

MEDICATIONS: Coumadin, Lanoxin, diltiazem, furosemide, pentoxifylline, Zocor, and lisinopril.

Physical EXAMINATION: Vital signs are as follows: Temperature 96.9, pulse 57, respiratory rate 16, and weight 154 pounds, blood pressure 104/50. In general, the patient is a well-nourished male in no apparent distress, alert and oriented ×3. Voice is with an electrolarynx. Head: No scalp or facial lesions or asymmetry. Eyes: Extraocular movements intact. Anicteric. Ears: TMs intact with no middle ear effusions. Nose: No masses. No discharge. Septum is straight. Oral cavity/oropharynx: Mucous membranes are moist. By visualization and palpation, no masses or lesions are seen including cheeks, floor of mouth, hard and soft palate, tongue, tonsils, posterior pharynx, lips, teeth, and gums. Indirect laryngoscopy: No masses within the nasopharynx, and the pectoralis flap is visible and viable. Neck: Laryngectomy stoma is widely patent without any lesions. There are no neck masses or lymphadenopathy. Incisions are all well healed.

Impression: No evidence of disease at this time. Patient does have worsening dysphagia and was offered esophageal dilation whenever he desires it. He does not want any at this time and would like to return to clinic in 3 months. **Plan:** Return to clinic in 3 months.

JOB 2 - Complete the SOAP Medical Transcription Form

DIRECTIONS: *Drake Ramoray, MD saw male patient Scott Staples, born October 20, 1943, today. Please use today's date for the date of exam and dictation date. Use tomorrow's date for the transcribed date.*

The patient returns today for evaluation of an abnormal chest x-ray. The patient had been in the emergency room 1 week ago with a complaint of right pleuritic chest pain. At that time, the chest x-ray was read as possible respiratory infection. Chest x-ray was obtained 1 year ago and revealed hilar granulomas and no follow-up was obtained. The patient was placed on erythromycin and Vicodin in the emergency room. He states that she has marked improvement in his pleuritic chest pain. He no longer has productive cough. He has been a smoker for many years and is currently smoking one-half pack of cigarettes per day. He worked as a janitor for many years. He denies any knowledge of severe pulmonary infections in the past.

Objective: The patient appears to be generally healthy. He is slightly overweight but well-muscled. VITAL SIGNS: Blood pressure 130/84, weight 188 pounds. SKIN: Acne over the face and psoriasis of the legs, both moderately active. NECK: There are no cervical or supraclavicular nodes palpable. LUNGS: Clear to auscultation and percussion. HEART: S1 and S2, no murmurs, rubs, or gallops. Assessment: 1. Recent acute lower respiratory infection with pleurisy. 2.

Abnormal chest x-ray with granulomas. 3. Tobacco abuse. 4. Multiple other systemic complaints as above. Plan: Discussed with the patient the nature of coccidioidomycosis and explained that an abnormal chest x-ray does not equal the diagnosis of cocci, but this certainly should be pursued. The patient will return in 1 week for follow-up.
