NATIONAL 2023

TOTAL POINTS

_____100 Points

Test Time: 60 minutes

Multiple Choice Questions

Directions: Identify the letter of the choice that best completes the statement or answers the question.

1. PoP3 sends e-mails between users or servers. What does PoP3 stand for?
 - A. Push office Protocol 3
 - B. Publish office Proxy 3
 - C. Public office Protocol 3
 - D. Post office Protocol 3

2. A user has downloaded an application file with the .dmg file extension. Which of the following operating systems can be used with this file by default?
 - A. Mac OS
 - B. iOS
 - C. Windows
 - D. Chrome OS

3. Which of the following controls the screen orientation?
 - A. Gyroscope
 - B. NFC
 - C. Accelerometer
 - D. GPA

4. A user will be traveling with a smartphone that contains confidential info. Which of the following should be disabled?
 - A. Keyboard
 - B. Speakers
 - C. Touchpad
 - D. Bluetooth

5. A function is best used for enabling programs to?
 - A. Hold a list of numbers
 - B. Define needed constant values
 - C. Define variables to hold different values
 - D. Be divided into reusable components

6. Which of the following is the best example of productivity software?
 - A. Word processing software
 - B. Entertainment software
 - C. Image editing software
 - D. Anti-malware software

7. Which one of the following is a secure network protocol?
 - A. IMAP
 - B. FTPS
 - C. SMTP
 - D. DNS
8. When applying ergonomics to a workstation area, which one of the following is the most important to consider?
 - A. Proper keyboard and mouse height
 - B. Amount of time computer will be used
 - C. Clarity of display
 - D. Brightness and contrast of the display
9. A technician wants to test a new OS version locally without interfering with a production installation. Which of the following is the best technology to use?
 - A. Cloud app software
 - B. Virtualization software
 - C. Telepresence software
 - D. Collaboration software
10. Short-term memory is used when a computer needs to temporarily store data. What hardware device is responsible for this?
 - A. HDD
 - B. SSD
 - C. RAM
 - D. PSU
11. ____ is a file system made for removable media that extends drive size support up to 64ZB but 512TB is the recommended max, is made for copying large files such as disk images or media files, and is supported by all versions of Windows
 - A. FAT16
 - B. FAT32
 - C. FAT64
 - D. NTFS
12. Which of the following is NOT apart of the IEEE 802.11 protocols?
 - A. n
 - B. a
 - C. d
 - D. ac

13. Which of the following would most likely prevent malware sent as compromised file via email from infecting a person's computer?
- A. Patching
 - B. Clear browsing cache
 - C. Kill process
 - D. Email previewing
14. A user wants to use a laptop outside the business and still remain connected to the Internet. Which of the following would be the best choice to accomplish this task?
- A. Thunderbolt cable
 - B. Bluetooth module
 - C. Infrared port
 - D. WLAN card
15. A database administrator finds that a table is not needed in a relationship database. Which of the following commands is used to completely remove the table and its data?
- A. UPDATE
 - B. DELETE
 - C. ALTER
 - D. DROP
16. Joe, a user, saves a document to a flash drive on his computer to print the document from a public computer kiosk. After returning home and reinserting the flash drive in his computer, the security software identifies an infected file on the flash drive. Which of the following is the most likely cause of the infection?
- A. The public workstation was infected and passed the virus to the flash drive
 - B. The flash drive was infected by a war driving hacker on the way to the public kiosk
 - C. The public workstation was infected by Joe's flash drive
 - D. The flash drive was already infected by the user's computer
17. When logging into a computer, which of the following is an example of multi-factor authentication?
- A. Logging on via key fob, password, and fingerprint reader
 - B. Entering an account number, PIN, and password to login
 - C. A technician using the fingerprint reader and retina scan
 - D. A user entering a strong password to log in

18. Joe, a user, has installed a new SOHO wireless router. The router keeps dropping PC connections. Which of the following should be checked?
- A. SSID
 - B. MAC address
 - C. Password
 - D. Firmware
19. What is the maximum data transfer rate of a SATA 3.2 HDD?
- A. 1.5 Gbps
 - B. 5 Gbps
 - C. 6 Gbps
 - D. 16 Gbps
20. A user is accessing an online bank account for the first time via an Internet browser. Which of the following should the user check?
- A. Exclamation point on the status bar
 - B. HTTP before the URL
 - C. Skull/crossbones symbol in the corner
 - D. Lock symbol in the address bar
21. A computer operates normally for a few minutes, but then the system “freezes” or “crashes”. What is the most likely cause?
- A. Case cooling fans are starting to fail
 - B. Device driver errors
 - C. Physical DIMM faults
 - D. Motherboard manufacturing defects
22. When setting up a new device, there are multiple features available that will never be used. Which of the following should the user do to make the new device more secure?
- A. Remove or disable unnecessary features
 - B. Make all users admins
 - C. Install a password manager on the device
 - D. Make all users’ guests
23. Which of the following file types is used to consolidate a group of files?
- A. .rtf
 - B. .m3u
 - C. .avi
 - D. .rar

24. To ensure that a user is hardening computer resources properly, the user should do which one of the following?
- A. Recognize suspicious hyperlinks
 - B. Use one account for all family members
 - C. Disable system timeouts
 - D. Use a password-protected screen saver
25. A traveling business user is utilizing an LTE cellular connection that provides good coverage but experiences numerous outages during a given week. This would be classified as which of the following?
- A. High mobility and high latency
 - B. High availability and low mobility
 - C. High mobility and low reliability
 - D. High availability and low throughput
26. A very successful design studio located in London, England allows its employees to use their own mobile devices to carry out work-related tasks. What is this organizational policy known as?
- A. BYOD
 - B. DRM
 - C. EULA
 - D. SSO
27. You are the senior IT technician for a large transnational company. The Director of IT has asked you if there are viable alternatives to the standard username and password when employees log on to their workstations. Which of the following peripherals could potentially be used as alternative log-on methods for employees?
- A. Biometric device
 - B. KVM switch
 - C. Mouse
 - D. USB key
28. Which type of video connector is primarily used with a computer (as opposed to a Smart TV) and carries an analog signal?
- A. DVI-A
 - B. DVI-I
 - C. HDMI Type A
 - D. M1-DA

29. An employee working for a prestigious software development firm reports that she is unable to decrypt email messages using her company-issued mobile device. The firm's IT technician has noticed that her mobile device does not have the correct digital certificate. What else could be potentially missing from the user's mobile device?
- A. POP3
 - B. Private key
 - C. Public key
 - D. SSL certificate
30. A technician is configuring a router for an accounting practice. In the interests of network security, the technician wants to ensure that the router assigns its public IP address to all data packets heading to external networks (e.g. Internet), thereby ensuring that the originating sources of data packets on the network (e.g. client workstations) remain hidden. Which feature of the router should be enabled to enhance network security?
- A. Channel
 - B. NAS
 - C. NAT
 - D. WEP
31. Which statement regarding LGA and PGA sockets is correct?
- A. LGA is a type of CPU socket on a motherboard that uses “lands” to connect the socket to the CPU
 - B. LGA is a type of CPU socket on a motherboard that uses a series of moveable “levers” to embed the CPU in the motherboard
 - C. PGA sockets have a multitude of tiny protrusions that facilitate connectivity between the processor and the motherboard
 - D. PGA sockets are a type of specialized motherboard socket into which the Northbridge chipset is installed
32. A large manufacturing facility predominantly relies on its server room installations for computing resources and, as a result, is less dependent upon the computing power of its client workstations. In this scenario, what term is commonly used to describe these client workstations?
- A. Thin clients
 - B. Thick clients
 - C. Virtual machines
 - D. Heavy clients

33. A PC repair technician is replacing the LCD screen of a laptop. What tool should the technician use to minimize the risk of damage to the plastic casing when removing the LCD screen?
- A. Crimper
 - B. Phillips-head screwdriver
 - C. Plastic shim
 - D. Torx screwdriver
34. What component on a motherboard typically supplies power to the CMOS after a computer is shut down?
- A. Li-ion battery
 - B. Li-ion polymer battery
 - C. NiCd
 - D. CR2032 battery
35. An inkjet printer is printing streaks on documents. What is the best first troubleshooting step to resolve this issue?
- A. Manually wipe the print heads with a clean, lint-free cloth
 - B. Replace the print ribbon
 - C. Use the printer's "Clean" option
 - D. Power cycle the printer
36. What term is used to describe the practice of sharing a mobile device's Internet connection with other Wi-Fi capable USD-connected devices?
- A. PAN
 - B. Synchronisation
 - C. Wi-Fi tethering
 - D. Bluetooth enabled
37. Which of the following connections offer the fastest data transfer rates?
- A. Thunderbolt
 - B. SuperSpeed USB
 - C. Firewire 800
 - D. Thunderbolt 3.0
38. Which of the following devices or installations is linked to a network and has the sole purpose of providing data to client workstations?
- A. Patch panel
 - B. Switch
 - C. NAS
 - D. Bridge

39. On which of the following computers is RAM capacity a very important consideration?
- A. AV workstation
 - B. Virtualisation workstation
 - C. HTPC
 - D. Gaming PC
40. A PC technician is troubleshooting a computer and he has opened the case. In the event of an unexpected power surge or electrical discharge, which of the following tools may be helpful in protecting the technician?
- A. Antistatic strap
 - B. Antistatic bag
 - C. Antistatic mat
 - D. Multimeter
41. What is user-replaceable memory in a PC called?
- A. SRAM
 - B. DRAM
 - C. SODIMM
 - D. Cache
42. What is the minimum number of HDDs necessary to set up a RAID 5 array?
- A. Two
 - B. Three
 - C. Four
 - D. Five
43. Which type of external connection permits the fastest hard drive data transfer?
- A. HDMI
 - B. HHD
 - C. eSATA
 - D. USB 3.0
44. Which of the following is the maximum speed of a USB 3.0-compatible ExpressCard device that uses a USB 2.0 bus?
- A. 400 Mbps
 - B. 480 Mbps
 - C. 5 Gbps
 - D. 10 Gbps

45. Which CLI tool can be used to determine the MAC address of a computer's NIC?
- A. netBIOS
 - B. netstat
 - C. ipconfig
 - D. ping -a
46. Which of the following encryption protocol combinations offers the most secure form of wireless encryption?
- A. WPA2-PSK (TKIP)
 - B. WPA-PSK (TKIP)
 - C. WPA2-PSK (AES)
 - D. WEP
47. Which of the following network devices allows a remote device (e.g. VoIP phone) to receive both data connectivity and electrical power?
- A. PoE injector
 - B. Repeater
 - C. Router
 - D. WAP
48. What is the minimum category networking cable required for a 1000Base-T network?
- A. Cat 3
 - B. Cat 5
 - C. Cat 5e
 - D. Cat 7a
49. What term is used to describe the delay in the RAM's response to a request from the MCC?
- A. Deferment
 - B. Lag time
 - C. Latency
 - D. Transfer speed
50. Which of the following is the most important item of information required to connect to a specific wireless network?
- A. QoS
 - B. Channel
 - C. SSID
 - D. MAC
