

COMPUTER MODELING

(425)

NATIONAL 2024

Topic

The Smithsonian Zoo in Washington D.C. is working with Australia's Taronga Zoo located in Sydney to add two platypuses to their collection to serve as ambassadors outside their native country of Australia. Freshwater resources and habitats are being affected by pollution and climate change and there is a need to communicate the importance of fresh water for both humans and wildlife. Your task is to design a habitat that can be built for these animals to be their new home in the US.

Judging Procedure

- As a team of judges, formulate two to three questions to ask at the conclusion of the presentation. Be sure to ask the same questions of each contestant.
- Contestants will present before a panel of judges and timekeeper.
- The length of set-up/wrap-up will be no more than three (3) minutes.
- The length of the presentation will be no more than ten (10) minutes; followed by judges' questions not to exceed five (5) minutes.
- Excuse contestants upon completion of judges' questions.
- **There can be no ties in the top ten (10) contestants.** It is the responsibility of the judges to break any ties.
- Administrator will fill out ranking sheet prior to dismissing the judges.
- If more than one (1) section is necessary, finalists will be determined by selecting an equal number from each section.
- Give administrator all Judges' Scoring Rubrics, Judge Comment Sheets, and contest materials.
- No audience is allowed in the contest room.

Please double-check and verify all scores!

Possible Questions

- What challenges did you face when creating this project?
- What research did you conduct prior to creating your model?
- Who do you feel will enjoy your model the most?
- Why did you choose the software you used for this project?
- What part of this project are you the proudest of?
- If you were to make this model again, what would you do differently?
- What problem solving skills did you apply in this event?
