Job 1: Import/Edit Table	_____ (100 points)
Job 2: Create Table	_____ (50 points)
Job 3: Query/Join Tables	_____ (100 points)
Job 4: Query/Report	_____ (100 points)
Job 5: Report With Calculations	_____ (100 points)
<i>TOTAL POINTS</i>	<i>_____ (450 points)</i>

Test Time: 90 minutes

GENERAL GUIDELINES:

Failure to adhere to any of the following rules will result in disqualification:

1. Member must hand in this test booklet and all printouts if any. Failure to do so will result in disqualification.
2. No equipment, supplies, or materials other than those specified for this event are allowed in the testing area. No previous BPA tests and/or sample tests (handwritten, photocopied, or keyed) are allowed in the testing area.
3. Electronic devices will be monitored according to ACT standards.

EXAM GUIDELINES:

1. Ensure this test booklet contains Jobs 1-5.
2. Key all jobs according to the instructions given.
3. Correct any and all formatting, spelling or grammar errors. Use the formatting guide in the *Style & Reference Manual*.
4. Your name or initials should *not* appear on any work you submit. Use your Member ID in any occasion you would normally key your reference initials.
5. In the lower **right** hand corner of ALL work submitted (unless otherwise specified), key your Member ID and job number.
6. If you complete the event before the end of the time allotted, notify the proctor. Time may be considered a factor in determining a winner when there is a tie score.
7. Place your scoring sheet on top of your jobs. Jobs should be placed in numerical order.

	Points Possible	Points Earned
Job 1. Import/Edit Table		
Table name is Alumni Imported Data – XXXXX	10	
Excel file imported correctly, including field names	10	
Added 5 new records (10 points per record)	50	
Column widths adjusted so all data is visible	10	
Total number of records is 105	10	
Pages 7 and 8 of table printed in landscape view	10	
Total for Job 1	100	
Job 2. Create Table		
Table name is Membership Type – XXXXX	10	
Field names entered correctly (no spaces)	10	
Data entered correctly	10	
Field type for DuesAmount field is currency	10	
Export table in pdf format	5	
Print pdf in portrait orientation	5	
Total for Job 2	50	
Job 3. Query/Join Tables		
Query includes FirstName, LastName, MembershipDate, DuesPayment, MembershipType, and GraduationYear fields	30	
DuesPayment amounts of \$45.00 show MembershipType of Gold, \$35.00 show Silver, and \$25.00 show Bronze	40	
Query sorted by last name in ascending order	10	
Query named Joined Query – XXXXXX	10	
Print in portrait orientation, with all fields on one page (total printout should be 3 pages)	10	
Total for Job 3	100	
Job 4. Query/Report		
Query includes FirstName, LastName, GraduationYear, State, DuesPayment	10	
Create stepped report from Grad Year/State/Dues query	10	
Report is grouped by Graduation Year	20	
Data within year groupings is sorted by State, then by Last Name, then by First Name	20	
Report title is Members by Graduation Year	10	
All fields and names are visible (no truncation)	10	
Removed date and page numbers from footer	5	
Inserted right footer with Member ID on one line and Job 4 on a second line	10	
Report printed in portrait orientation	5	
Total for Job 4	100	
Job 5. Report With Calculations		
Report created using query with GraduationYear, LastName, FirstName, and DuesPayment fields	10	

DATABASE APPLICATIONS

STATE 2024

Page 4 of 6

Report titled Dues by Graduation Year	5	
Report is grouped by Graduation Year and sorted by Last Name	20	
Report is in Stepped layout	10	
Report includes Sum and Average group calculations	20	
Report includes Grand Total calculation	10	
Fields have been resized so that all data, sums and averages are visible	10	
Removed date and page numbers from footer	5	
Inserted right footer with Member ID on one line and Job 4 on a second line	5	
Report printed in portrait orientation	5	
Total for Job 5	100	
Total Points Earned	450	

As a Database Specialist for Digital Solutions, you have been tasked with creating a database for an alumni association. Please follow the instructions for each of the jobs listed below.

Job 1 –Import/Edit Alumni Data File

1. Import data from an Excel file named **Job1 Data File** into a new table, allowing Access to add a primary key ID field to the data. Use the field names as provided in the Excel data file. Name the table **Alumni Imported Data – XXXXXX**, where the “XXXXXX” is your Member ID Number.
2. Add the following records to the **Alumni Imported Data – XXXXX** table:
 - Mirai Sugiura, 3090 Charter Street, Kansas City, KS 64106, msugiura12@hotmail.com, 10/24/2023, \$45, 2023
 - George Keith, 3341 Long Street, Brooklyn, NY 11201, george_keith77323@gmail.com, 10/26/2023, \$45, 2023
 - Patrick Smith, 238 Camden Place, Poughkeepsie, NY 12601, patrickjsmith88@yahoo.com, 11/01/2023, \$35, 2023
 - Callie Small, 1466 Joanne Lane, Lowell, MA 18052, calliesmall92@gmail.com, 11/14/2023, \$45, 2023
 - Jada Jackson, 969 Stark Hollow Road, Centennial, CO 80112, jjackson2023@hotmail.com, 12/17/2023, \$45, 2023
3. Resize columns in Alumni Imported Data table to fit data so that all data is visible.
4. Print the last two pages of the Alumni Imported Data table showing the new records in landscape orientation.

Job 2 – Create Table

1. Create a Membership Type table with the data below. Name the table **Membership Type – XXXXXX**, where the “XXXXXX” is your Member ID Number. Use the field names as shown in the table below, and consider the data when using field types, widths, properties, etc.

MembershipType	DuesAmount
Gold (5-Year)	\$45.00
Silver (3-Year)	\$35.00
Bronze (1-Year)	\$25.00

2. Export table to PDF format.
3. Print the PDF in portrait orientation.

Job 3 – Query/Join Tables

1. Create a Query joining the two tables. The Query must include the following fields: FirstName, LastName, MembershipDate, Dues Payment, Membership Type, and Graduation Year.
2. Be sure that the dues payment amount matches the membership type when you run the Query (i.e., \$45.00 = Gold, \$35.00 = Silver, \$25.00 = Bronze).
3. Sort the Query in ascending order by LastName and save it as **Joined Query – XXXXXX**.
4. Print Joined Query – XXXXXX in portrait orientation, ensuring all fields fit horizontally on one page. There will be multiple pages of data.

Job 4 – Query/Report

1. Create a Query from the Alumni Imported Data table with the fields FirstName, LastName, GraduationYear, State and DuesPayment, saving the Query as **GradYear/State/Dues**.
2. Using the Report Wizard, create a stepped report in portrait orientation from the **GradYear/State/Dues** query and using the following specifications.
 - Include all fields from the query in the report
 - Group the report by GraduationYear
 - Sort by State, then Last Name, then First Name
 - Use currency format for DuesPayment field
 - Title the report Members by Graduation Year
3. Adjust any fields labels or data so that all fields/data are visible.
4. Remove the date and page numbers in the page footer and insert a right footer with your Member ID and Job 4 on separate lines in the footer.
5. Print the Report in portrait orientation.

Job 5 – Report With Calculations

1. Use the GradYear/State/Dues Query to create a Report titled **Dues by Graduation Year**.
2. Include the FirstName, LastName, GraduationYear and DuesPayment fields in the report.
3. Group the report by Graduation Year, and sort the report by LastName in ascending order.
4. Use a Stepped layout and include Detail and Summary Sum and Average calculations for DuesPayment in the report.
5. Use a Stepped layout in portrait orientation.
6. Extend, resize, and/or move detail fields so that the sums and averages are all visible on the report.
7. Remove the date and page numbers from the footer.
8. Insert a right footer with your Member ID on one line and Job 5 beneath it on another line.
9. Print the report in portrait orientation.
