Multiple Choice (50 @ 2 points each)

_____ (100 points)

Test Time: 60 minutes

Multiple Choice Questions

Directions: Identify the letter of the choice that best completes the statement or answers the question.

1. What does IDE stand for?
 - A. Integrated Drive Electronics
 - B. Internet Development Environment
 - C. Internal Data Encryption
 - D. Interface Device Extension
2. How many devices can typically be connected to a single SATA interface?
 - A. 1
 - B. 2
 - C. 4
 - D. 8
3. Which of the following is NOT a characteristic of SCSI devices?
 - A. Plug and play support
 - B. High device scalability
 - C. Wide range of supported devices
 - D. Use of USB Type-C connectors
4. USB Type-C is a:
 - A. Type of storage device
 - B. USB port specification
 - C. Network protocol
 - D. Video display standard
5. Which storage interface allows for daisy-chaining multiple devices together?
 - A. IDE
 - B. SATA
 - C. SCSI
 - D. USB Type-C
6. USB Type-C connectors can support which of the following protocols?
 - A. USB 2.0
 - B. USB 3.0
 - C. Thunderbolt 3
 - D. HDMI
7. Which of the following is NOT a benefit of using USB Type-C?
 - A. Faster data transfer speeds
 - B. Enhanced power delivery
 - C. Increased device compatibility
 - D. Lower cost compared to other interfaces

8. Which component provides permanent storage for data, even when the computer is turned off?
 - A. RAM
 - B. CPU
 - C. HDD
 - D. PSU
9. Which component is responsible for supplying power to all other components in a computer?
 - A. PSU
 - B. RAM
 - C. CPU
 - D. GPU
10. Which component is responsible for controlling the movement of the mouse cursor on the screen?
 - A. RAM
 - B. CPU
 - C. GPU
 - D. Mouse
11. Which component is responsible for cooling the CPU and other heat-generating components in a computer?
 - A. CPU Cooler
 - B. RAM
 - C. PSU
 - D. Motherboard
12. Which component is responsible for reading data from and writing data to optical discs?
 - A. Optical Drive
 - B. GPU
 - C. CPU
 - D. RAM
13. Which component provides temporary storage for data that the CPU is currently working on?
 - A. SSD
 - B. GPU
 - C. RAM
 - D. Power Supply
14. Which component is responsible for managing and controlling all other components in a computer system?
 - A. CPU
 - B. Motherboard
 - C. PSU
 - D. GPU

15. Which component is responsible for converting digital signals from the computer into sound signals for audio output?
 - A. GPU
 - B. RAM
 - C. Sound Card
 - D. SSD
16. A user reports that their external hard drive is not detected when plugged into a USB port. Which step should you perform first to troubleshoot the issue?
 - A. Try a different USB port
 - B. Update the device drivers
 - C. Format the hard drive
 - D. Replace the USB cable
17. A user reports that their wireless mouse is not working. What is the first thing you should check?
 - A. Battery level in the mouse
 - B. Bluetooth connectivity
 - C. USB receiver connection
 - D. Mouse settings on the computer
18. If a monitor connected to a computer's HDMI port is displaying a "No Signal" message, what should you check first?
 - A. Monitor power supply
 - B. HDMI cable connection
 - C. Graphics card drivers
 - D. Monitor resolution settings
19. Which peripheral device allows you to hear audio output from a computer?
 - A. Printer
 - B. Headset
 - C. Webcam
 - D. Keyboard
20. Which of the following is a storage device?
 - A. Mouse
 - B. Keyboard
 - C. Hard drive
 - D. Projector
21. Which of the following is a common step in troubleshooting computer issues?
 - A. Rebooting the system
 - B. Installing new software
 - C. Ignoring the problem
 - D. Deleting important files

22. If a printer is not printing correctly, what should be the first step in troubleshooting the issue?
- A. Replacing the ink cartridges
 - B. Checking the printer settings
 - C. Throwing away the printer
 - D. Printing from a different computer
23. What is an example of preventative maintenance for a printer?
- A. Never replacing the ink cartridges
 - B. Cleaning the printhead regularly
 - C. Keeping the printer in direct sunlight
 - D. Using low-quality paper
24. What is an example of preventative maintenance for a laptop?
- A. Exposing it to extreme temperatures
 - B. Never cleaning the keyboard
 - C. Regularly updating the operating system
 - D. Overcharging the battery constantly
25. Which operating system is known for its user-friendly interface and extensive software compatibility?
- A. Windows
 - B. Linux
 - C. macOS
 - D. FreeBSD
26. Which operating system is developed by Microsoft?
- A. Windows
 - B. Linux
 - C. macOS
 - D. Android
27. Which operating system is known for its high level of customization and flexibility?
- A. Windows
 - B. Linux
 - C. macOS
 - D. iOS
28. Which utility is used to create and manage user accounts in Windows?
- A. Control Panel
 - B. System Preferences
 - C. User Accounts
 - D. User Manager

29. Which operating system is commonly used in embedded systems and Internet of Things (IoT) devices?
- A. Windows
 - B. Linux
 - C. macOS
 - D. iOS
30. Which partition type is commonly used for Windows installations?
- A. FAT32
 - B. NTFS
 - C. ext4
 - D. HFS+
31. Which file system type is commonly used in macOS?
- A. FAT32
 - B. NTFS
 - C. ext4
 - D. HFS+
32. What is the maximum file size supported by the FAT32 file system?
- A. 2 GB
 - B. 4 GB
 - C. 8 GB
 - D. 16 GB
33. What is the command-line interface command used to format a drive in Windows?
- A. mkfs
 - B. format
 - C. fdisk
 - D. mount
34. What is the primary function of a primary partition in a computer system?
- A. It serves as a bootable partition.
 - B. It provides additional storage space.
 - C. It enhances system performance.
 - D. It isolates system files from user data.
35. Which of the following connectors is commonly used to connect a CPU to the motherboard?
- A. LGA
 - B. SATA
 - C. USB
 - D. HDMI

36. Which type of RAM is typically compatible with modern desktop computers?
- A. DDR
 - B. SIMM
 - C. EDO
 - D. SDRAM
37. What type of expansion slot is commonly used for graphics cards?
- A. PCI
 - B. AGP
 - C. PCIe
 - D. USB
38. What type of storage interface is used by solid-state drives (SSDs)?
- A. IDE
 - B. SATA
 - C. SCSI
 - D. PATA
39. Which of the following is NOT a necessary component for a computer to boot up?
- A. CPU
 - B. RAM
 - C. Graphics card
 - D. Power supply
40. What type of connector is commonly used to connect a monitor to a graphics card?
- A. DVI
 - B. USB
 - C. Thunderbolt
 - D. Ethernet
41. What is the purpose of a CMOS battery in a computer?
- A. Provides power to the CPU
 - B. Stores BIOS settings
 - C. Controls fan speed
 - D. Manages network connections
42. Which type of expansion slot is commonly used for Wi-Fi and Bluetooth cards?
- A. PCI
 - B. AGP
 - C. PCIe
 - D. USB
43. Which of the following is NOT a characteristic of cloud services?
- A. Scalability
 - B. High availability
 - C. Data security
 - D. Limited storage capacity

44. Which of the following is an example of a public cloud provider?
- A. AWS (Amazon Web Services)
 - B. VMware
 - C. Microsoft Azure
 - D. OpenStack
45. Which cloud service model allows users to develop, run, and manage applications without the complexity of infrastructure management?
- A. IaaS
 - B. PaaS
 - C. SaaS
 - D. FaaS
46. Which of the following is NOT a potential security concern when using cloud services?
- A. Data breaches
 - B. Vendor lock-in
 - C. Lack of control over data location
 - D. Insufficient network bandwidth
47. What does the term "auto-scaling" refer to in cloud computing?
- A. Automatically backing up data in multiple locations
 - B. Automatically adjusting resources based on demand
 - C. Automatically encrypting data at rest and in transit
 - D. Automatically monitoring and reporting system performance
48. Which cloud deployment model is most suitable for organizations with shared concerns, such as security or compliance requirements?
- A. Public cloud
 - B. Private cloud
 - C. Hybrid cloud
 - D. Community cloud
49. What type of firewall examines each packet of data passing through it and determines whether to allow or block it based on a set of predetermined rules?
- A. Stateful firewall
 - B. Proxy firewall
 - C. Packet-filtering firewall
 - D. Application-level gateway
50. Which firewall setting allows all outbound traffic but blocks all inbound traffic?
- A. Inbound firewall
 - B. Outbound firewall
 - C. Bidirectional firewall
 - D. Default allow
