# Health Administration Procedures (610)

## STATE 2025

Multiple Choice:

25 @ 2 points each \_\_\_\_\_ (50 points)

Matching:

10 @ 2 points each \_\_\_\_\_ (20 points)

Application Knowledge:

10 @ 3 points each \_\_\_\_\_ (30 points)

**TOTAL POINTS** \_\_\_\_\_ **(100 points)**

### Test Time: 60 minutes

**GENERAL GUIDELINES:**

***Failure to adhere to any of the following rules will result in disqualification:***

1. The contestant must hand in this test booklet and all printouts if any. Failure to do so will result in disqualification.
2. No equipment, supplies, or materials other than those specified for this event are allowed in the testing area. No previous BPA tests and/or sample tests (handwritten, photocopied, or keyed) are allowed in the testing area.
3. Electronic devices will be monitored according to ACT standards.

**Directions:** Identify the letter of the choice that best completes the statement or answers the question.

1. Which type of code is used to describe the reason for a patient's encounter with a healthcare provider?
  - A. ICD-10-CM code
  - B. CPT code
  - C. HCPCS Level II code
  - D. ICD-10-PCS code
2. What is the purpose of ICD-10-PCS coding?
  - A. To assign modifiers to medical codes
  - B. To categorize diagnoses for inpatient hospital services
  - C. To identify durable medical equipment (DME) for billing purposes
  - D. To report inpatient medical procedures and services
3. What is the purpose of modifiers in medical coding?
  - A. To indicate the severity of a medical condition
  - B. To specify the location of a medical procedure
  - C. To provide additional information about services or procedures performed
  - D. To categorize medical services into different levels of complexity
4. What does the term "upcoding" refer to in medical billing?
  - A. Coding a lower-level service than was actually provided to a patient
  - B. Coding a higher-level service than was actually provided to a patient
  - C. Submitting a medical claim electronically
  - D. Assigning the wrong diagnosis code for the patient's condition
5. Which of the following best defines "ophthalmology"?
  - A. The process of listening to internal sounds of the body
  - B. The medical specialty focused on the diagnosis and treatment of diseases of the ears
  - C. The medical specialty focused on the diagnosis and treatment of diseases of the eyes
  - D. The study of the structure and function of the eye
6. Which of the following best defines "sphygmomanometer"?
  - A. A device used to measure blood pressure
  - B. A medical instrument used to listen to internal sounds of the body
  - C. A diagnostic imaging technique that uses X-rays to produce cross-sectional images of the body
  - D. A tool used to measure heart rate

7. In the context of medical ethics, what does the principle of autonomy refer to?
  - A. The obligation to do no harm to patients
  - B. The duty to act in the best interests of patients
  - C. The right of patients to make their own decisions about their medical treatment
  - D. The responsibility to treat all patients equally and without discrimination
8. What is the role of strategic planning in healthcare administration?
  - A. To implement short-term goals without considering long-term objectives
  - B. To develop comprehensive plans that align organizational goals with external factors and market dynamics
  - C. To maintain the status quo and resist change initiatives
  - D. To focus solely on financial performance metrics without considering patient satisfaction
9. A new healthcare policy is proposed in your community to improve access to mental health services. How would you advocate for this policy?
  - A. Contact local legislators to express support for the policy
  - B. Share information about the policy with colleagues and community members
  - C. Ignore the proposed policy as it's not directly related to your role
  - D. Implement the policy within the medical office without community involvement
10. You need to transmit patient medical records to a specialist for consultation. What is the appropriate step to ensure the security and privacy of the data during transmission?
  - A. Send the records via unencrypted email to expedite the process
  - B. Use a secure file-sharing platform with end-to-end encryption to transmit the records securely
  - C. Fax the records to the specialist's office to ensure a direct and secure transmission
  - D. Print out the records and mail them to the specialist via postal service
11. What is the correct definition for "EKG"?
  - A. A medical imaging technique that uses magnetic fields and radio waves to create detailed images of the organs and tissues within the body.
  - B. A test that records the electrical activity of the heart over a period of time.
  - C. A surgical procedure to remove a part of the body, usually a tumor or abnormal tissue.
  - D. A device used to measure blood pressure.
12. What is the primary purpose of maintaining an alphabetical filing system in a medical office?
  - A. To facilitate quick access to patient information
  - B. To organize patient records by date of birth
  - C. To sort records based on medical conditions
  - D. To track patient billing statements

13. What type of inventory does a medical office typically maintain?
  - A. Food and beverage inventory
  - B. Office furniture inventory
  - C. Equipment and supplies inventory
  - D. Patient medication inventory
14. Which principle should guide the preparation of medical reports in terms of format?
  - A. Use colorful fonts for emphasis
  - B. Follow industry-specific guidelines
  - C. Include personal anecdotes
  - D. Use excessive abbreviations
15. What is the primary goal of advocating for policies that improve access to healthcare services?
  - A. Reducing administrative workload
  - B. Enhancing patient satisfaction
  - C. Maximizing profits
  - D. Expanding the medical office building
16. Which of the following is an example of a medical office document that contains patient account information?
  - A. Medical research report
  - B. Employee performance evaluation
  - C. Billing statement
  - D. Office meeting notes
17. Which of the following tasks involves handling confidential information securely in a medical office?
  - A. Preparing medical reports
  - B. Managing office supplies inventory
  - C. Sending promotional emails
  - D. Scheduling patient appointments
18. What is the purpose of a patient consent form?
  - A. To authorize permission for medical procedures
  - B. To collect patient feedback
  - C. To schedule follow-up appointments
  - D. To authorize referrals to specialty physicians
19. Which of the following best describes the concept of “superbill” in medical billing”?
  - A. A bill for office cleaning supplies
  - B. A bill for medical equipment repairs
  - C. A summary of services provided during a patient visit
  - D. An itemized list of charges incurred following a surgery

20. What is the purpose of a release form in a medical office?
- A. To schedule routine office maintenance
  - B. To authorize the release of patient records
  - C. To request release time during working hours
  - D. To release expired vaccines
21. What information is generally included in an EOB?
- A. Details of insurance coverage and payments
  - B. Patient appointment reminders
  - C. Office closing/End of Day procedures
  - D. Emergency On-call Backup; contact information for after-hours support
22. What is the role of a guarantor in medical billing?
- A. They are responsible for verifying insurance coverage
  - B. They are the primary healthcare provider
  - C. They assume financial responsibility for a patient's medical bills
  - D. They handle billing inquiries
23. What distinguishes primary insurance from secondary insurance in the billing process?
- A. Primary insurance pays first, secondary insurance pays after primary insurance
  - B. Primary insurance covers preventive care, secondary insurance covers emergencies
  - C. Primary insurance is government-funded, secondary insurance is private
  - D. Primary insurance requires referrals, secondary insurance does not
24. What health insurance plan generally requires members to select a primary care physician (PCP) who coordinates all their healthcare needs and referrals to specialists
- A. Health Maintenance Organization (HMO)
  - B. Preferred Provider Organization (PPO)
  - C. Exclusive Provider Organization (EPO)
  - D. Point of Service (POS)
25. What is the purpose of a copayment in the context of healthcare?
- A. To cover the cost of medical services provided
  - B. To discourage patients from seeking medical care
  - C. To share the cost of medical services between the patient and the insurance provider
  - D. To provide financial assistance to low-income patients

**Matching:** Match the abbreviation with the best definition.

\_\_\_\_\_ 1. Anaphylaxis

\_\_\_\_\_ 6. Hemorrhage

\_\_\_\_\_ 2. Thrombosis

\_\_\_\_\_ 7. Embolism

\_\_\_\_\_ 3. Neoplasm

\_\_\_\_\_ 8. Ischemia

\_\_\_\_\_ 4. Arrhythmia

\_\_\_\_\_ 9. Edema

\_\_\_\_\_ 5. Dyspnea

\_\_\_\_\_ 10. Atrophy

- A. A blockage of a blood vessel caused by a detached clot or foreign material that travels through the bloodstream and becomes lodged in a smaller vessel, leading to tissue damage or organ dysfunction.
- B. Insufficient blood supply to tissue or organs due to reduced blood flow, often resulting from narrowed or blocked arteries and contributing to conditions such as heart attack or stroke.
- C. The formation of a blood clot within a blood vessel, obstructing blood flow and potentially leading to complications such as heart attack or stroke.
- D. Irregular heartbeat or heart rhythm which may manifest as palpitations, dizziness, or fainting and can increase the risk of complications such as stroke or heart failure.
- E. A severe and potentially life-threatening allergic reaction characterized by symptoms such as difficulty breathing, swelling of the throat, and a drop in blood pressure.
- F. The gradual wasting or shrinkage of muscle or tissue due to disuse, injury, or disease, leading to weakness and loss of function in affected areas.
- G. Excessive bleeding or blood loss from a ruptured blood vessel, which can occur internally or externally and may result from trauma, injury, or medical conditions such as gastrointestinal bleeding.
- H. Swelling or fluid retention in body tissues, typically occurring in the extremities but may also affect other parts of the body, and commonly associated with conditions such as heart failure or kidney disease.
- I. An abnormal growth or tumor resulting from uncontrolled cell division, which may be benign (non-cancerous) or malignant (cancerous).
- J. Difficulty or discomfort in breathing, often characterized by shortness of breath, wheezing, or tightness in the chest, and commonly associated with conditions such as asthma or heart failure.

**Instructions:** Review the Case Study provided below. You will be entering information from the Case Study into your office computer system to prepare the visit for billing. Provide the information to answer each of the questions listed below. All answers must be legible.

**Case Study**

Chris S. Jones, DOB 12/23/2021, was brought to the medical clinic by his mother, Amber Jones, for a sore throat. Amber provided (2) insurance cards to the person who checked them in for the appointment. Chris is covered by his mother's group health insurance plan and by his father's group health insurance plan. The insurance information provided is listed below.

Blue Cross Blue Shield

Policy holder: Amber R. Jones

Policy Number: 998877

Member ID Number: X0F5236987-03

Relationship to Subscriber: Child

Policy holder Birthdate: 03/03/1996

Subscriber Member ID Number: X0F5236987-01

United HealthCare

Policy holder: Jonathon F. Jones

Policy Number: C556781

Member ID Number: 00024751C

Relationship to Subscriber: Child

Policy holder Birthdate: 01/09/1991

Subscriber Member ID Number: 00024751A

Provide the information to answer each of the questions listed below, based on the case study provided on the previous page. All answers must be legible.

1. Who is the policy holder for the primary insurance plan?
2. Provide the name of the insured for the primary insurance plan.
3. What is the name of the insured for the secondary insurance plan?
4. Provide the patient's Member ID number for the primary insurance plan.
5. What is the Policy or Group Number for the primary insurance plan?
6. What is the name of the primary insurance plan?
7. What is the patient's date of birth?
8. What is the secondary insurance Policy or Group Number?
9. What is the patient's relationship to the insured for the secondary insurance plan?
10. Provide the patient's name.
