Description & Eligibility

Using current technologies and software, prepare and deliver an effective multimedia presentation on the topic provided. Any postsecondary or secondary division contestant may enter this judged event. A contestant may not participate in more than one of the following events in the same year. Presentation Individual and Prepared Speech. A previously used presentation may not be used. Entries that do not follow the provided topic or the Copyright and/or Fair Use Guidelines will be disqualified.

Topic

New generative-AI tools—such as ChatGPT for writing help, Adobe Firefly for images, and Sora for video creation—are rapidly changing how teachers teach and how students approach learning. These technologies can break down tough lessons, give instant feedback on essays, and quickly create eye-catching visuals, but they also raise concerns about academic integrity, over-reliance, and data privacy.

Your challenge is to craft a multimedia presentation that shows how generative AI is reshaping education from elementary classrooms to university lecture halls. Use solid research—articles, studies, and school surveys—plus real stories you have observed or experienced. Highlight the key benefits, such as personalized tutoring, adaptive feedback, and creative project support, while also examining the main risks, including academic dishonesty, misinformation, and unequal access to reliable AI tools. Finish by sharing a concise call to action—a set of three practical steps—to help educators, students, and families use AI smartly, safely, and fairly.

Points to consider include, but are not limited to:

- Benefits (personalized tutoring, adaptive feedback, creative project support, etc.)
- Risks (academic dishonesty, AI misinformation, access gaps, etc.)
- Call to Action (develop a brief three-step plan that schools can adopt immediately)

Contestant Must Supply
