Description & Eligibility

Create a 2D computer animation, at least (1:30) and not to exceed (2:30) minutes, based upon the provided topic. This national event will be submitted and judged virtually. Awards will be presented at the National Leadership Conference. Any middle level, secondary or postsecondary contestant may enter this event. A team will consist of 2-4 contestants. There are no restrictions on the number of entries per chapter or per state. **Contestants who do not submit an entry following the topic listed below or do not follow the Copyright and/or Fair Use Guidelines will be disqualified.**

Topic

Smart Solutions for a Healthier Planet: A GLOBE Community's Journey with IoT. Create a 2D animation that showcases a diverse group of students or citizens from different parts of the world using Internet of Things (IoT) devices and smart technology to observe, collect, and share environmental data through the NASA GLOBE Program. Your animation should tell a compelling story of how these individuals collaborate to solve a local or global environmental challenge—such as monitoring air quality, tracking soil moisture, or responding to climate impacts—through data-driven decision making and community action.

Requirements:

- Feature at least one GLOBE sphere (Atmosphere, Biosphere, Hydrosphere, Pedosphere).
- Demonstrate how smart sensors or IoT-enabled tools (e.g., air quality monitors, remote weather stations, water sensors, smart apps) are used to collect and share data.
- Incorporate storytelling elements that highlight teamwork, scientific discovery, and the impact of open data.
- Showcase a transformation or improvement in the environment or community as a result of the project.
