

### Description & Eligibility

Contestants will demonstrate essential spreadsheet skills to organize, analyze, and present data with precision. Learn to design and format workbooks, build automated solutions using formulas and references, create charts, and apply styles and validation for professional, user-friendly reports. Any secondary or postsecondary division contestant may enter this application event. Contestants may *not* enter Fundamental and Advanced Spreadsheet Applications in the same year. This event may *not* be repeated.

### Contestant Must Supply

- Published and/or unpublished non-electronic written reference materials

### Equipment/Supplies Provided

- Computer and software

### Contest Notes

- Method of evaluation: application
- AI Policy Level 1 *No AI Allowed*
- All student-produced jobs completed on-site are uploaded electronically and are not printed at the national level
- Previous Business Professionals of America tests and/or sample tests (handwritten, photocopied or keyed) may not be taken into the testing area. Violation of this rule will result in disqualification.
- Length of event: no more than ten (10) minutes orientation, no more than ninety (90) minutes testing time, and no more than ten (10) minute wrap-up
  - No more than fifty (50) minutes for certification test
- At NLC, contestants will take MOS Excel 365 Associate certification as part of the event. Contestants passing this certification will have 50 points added to their event score
  - A Pearson profile must be created at <https://certiport.pearsonvue.com> before attending NLC
  - Contestants must include their BPA Contestant ID in their Pearson profile when they register
  - Certiport Parent/Legal Guardian Consent Form must be uploaded to: [education@bpa.org](mailto:education@bpa.org)
  - For more information on the exam, visit <https://certiport.pearsonvue.com>
  - Reference materials are not allowed for certification testing
- Entries vary by state

### Contest Competencies

1. Design, format, and manage worksheets and workbooks using spreadsheet tools to organize, analyze, and present data accurately and efficiently
2. Develop formulas/functions to create automated spreadsheet solutions
3. Apply mixed, absolute, and relative cell references, including cross-sheet references
4. Create charts and organize data using outlines, groups, and subtotals to enhance reporting
5. Enhance spreadsheet usability and presentation by applying styles, validating data, auditing formulas, and customizing print options
