

405 Advanced Desktop Publishing

Description & Eligibility

Contestants will apply advanced desktop publishing skills to produce creative marketing materials. Any secondary or postsecondary division contestant may enter this application event.

Contestant Must Supply

- Published and/or unpublished non-electronic written reference materials
- Optional - Mac computer. Contestant must also bring software and extension cords. Carry-in and setup of equipment must be done solely by the contestant within the time allotted. Business Professionals of America assumes no responsibility for hardware/software provided by the contestant

Equipment/Supplies Provided

- Computer and software
- Graphic files

Competition Notes

- Method of evaluation: application
- AI Policy Level 1 *No AI Allowed*
- All student-produced jobs completed on-site are uploaded electronically and are not printed at the national level
- No equipment, supplies or materials other than those specified for an event are allowed in the testing area
- Previous Business Professionals of America tests and/or sample tests (handwritten, photocopied or keyed) may not be taken into the testing area. Violation of this rule will result in disqualification
- Contestants can use software templates, but creativity points may be reduced
- Length of event: no more than ten (10) minutes orientation, no more than ninety (90) minutes testing time, and no more than ten (10) minutes wrap-up
- At NLC, contestants will take the Desktop Publishing II (YouScience) certification with their contest. Reference materials are not allowed for certification testing
- Entries may vary by state

Contest Competencies

1. Apply advanced and modern graphic design principles & elements—including layout, color theory, typography, and visual hierarchy—to create cohesive, visually compelling designs for print and digital media
2. Develop advanced creative concepts and original artwork that visually communicate themes, messages, and brand identity to clients and stakeholders
3. Utilize advanced technical skills and industry-standard software to edit, manipulate, and optimize graphics, artwork, and images for diverse design applications
